Thread: [Write to hidden partition, Drag File \[OUT\] of form](#)

KingDeath360 - December 25, 2014, 4:55 pm

Drag File [OUT] of form

We all know how to drag a file into the form.

But this lets us drag one out

So for example you are building a 'FTP Manager' you will want to drag the remote files to the desktop

Code Private Sub Button1_DragLeave(sender As Object, e As EventArgs) Handles

Button1.MouseDown

Dim filepath As String = "D:\Users\lol\AppData\Temp\lol.txt"

Dim data As DataObject = New DataObject()

data.SetData(DataFormats.FileDrop, New String() {filepath})

Button1.DoDragDrop(data, DragDropEffects.Copy)

End Sub

Write to hidden partition

If you have a hidden partition, you will want to write data to it without assigning a drive-label

Code Dim array() As Int32 = {1, 4, 6, 7, 11, 55, 777, 23, 266, 44, 82, 93}

Using writer As BinaryWriter = New

BinaryWriter(System.IO.File.Open("\\?\Volume{343894234-3D32-34E3-DF34-343423432423443}\\ol.txt", FileMode.Create))

' Write each integer.

For Each value1 As Int32 In array

writer.Write(value1)

Next

End Using

"\\?\Volume{343894234-3D32-34E3-DF34-343423432423443}\\ol.txt"

May you better explain this part?

And, for each value1 in Array? Which array?

Read the code again and you'll see. But then again this could of been prevented if OP used decent naming conventions.
