I think I have a little over two.

Obviously you have a lot of posts per day if you signed up two days ago.. Just wait after a few months it'll go down. Unless you just keep on posting lol.

Factørial - December 25, 2014, 9:52 pm

I'm at 4 I think. Feel no need to post anymore. Everything just bores me on here but I continue to come here because I'm already bored.

Vitani's Mate - December 25, 2014, 9:58 pm

This is my stats.

76,322 (42.76 posts per day | 0.17 percent of total posts)

Used to be around 70 to 80 when I was posting a lot.

Retaw - December 25, 2014, 10:28 pm

I'm around 13-14 a day, but I agree, newer people tend to have more due to them being new and not having much away days from the website. I'm sure it will go down, but for now it seems to be rising.

Mr. Fedora - December 25, 2014, 10:30 pm

I'm currently at 2.12 posts per day :)

Bin Corleone - December 25, 2014, 10:35 pm

I feel special having the lowest in this thread so far (not for long I'd think?) :3

Edit: Damn someone above me got one of the lowest.

I can actually vouch for this.

Mine hovers between 4 and 5 a day.

~Jay~ - December 25, 2014, 10:39 pm

Please, my post count was over 50 for the first month or so I was here. In retrospect those probably weren't the most quality posts.

Sumix - December 25, 2014, 10:39 pm

I currently have 3.91 posts per day and it usually stays around that.

Friendly HF User - December 25, 2014, 10:50 pm

After a few months on the forums that will go down a lot.
