Rant:

Spoiler ([Click to View](#)) I hate when people have ridiculous signature when they have \$19,000/week !!! Click here !!!

Yet they are still asking for my methods that earn way less...

Just felt like I had to get that out there.

Still wondering why americans eat that shit for breakfast

No doubt they're fat as feck

IntelliJ - December 26, 2014, 6:01 am

Well I've been assembling this PC for the past 3 hours (I screwed up on something the first time - first PC build. Exciting!) so I'm planning on grabbing McDonalds as well. Hotcakes, two hashbrowns and possibly a cup of coffee.

Seabee - December 26, 2014, 6:03 am

Wish I had time to go to mcdonalds right now; I'm sitting at work.

It's not just "Americans." <http://prntscr.com/5l3k6n>

While we do have the largest amount, we have a large population that's rather fit. The older generations are tending to be larger while the "current" generation (my generation) is slimming down. Out of one hundred people, 19 are "overweight" however we can classify overweight as even being a pound over what's considered "normal."

Saying Americans are fat is like saying all Brits are drunks.

Even at breakfast <<< that's what I meant.

This.

<http://prntscr.com/5l3m2g> Except for sodium and carbs, which let's be honest pretty much everything is high in, they're pretty damn low in everything else making them a viable part of your day - even if you go with the whole "5 small"er" meals" thing.

The hashbrowns too. Omg. They're fucking death waiting to happen but they're soooo good.

I might just go get hashbrowns and hotcakes right now. Thank you for driving my appetite through the roof. ?

But yeah, the hashbrowns are quite good.

To be on topic, I'm probably gonna have some cereal or eggs with toast.

I usually make my own breakfast rather than go out to a place like McDonalds.

EDIT: I'm actually gonna make this:
