Thread: [Lizard Squad vs Finest Squad](#)

I was just browsing around and found an interview between both these groups.

Killer Keemstar had hosted an interview and both these groups went at each other and i felt that Lizard Squad is just full of shit.

In the video they couldn't even answer Finest Squads's question.

Finest Squad also mentioned hackforums which was funny.

What are you thoughts on
Finest Squad and Lizard Squad.

Also, some of Lizard Squad members had been arrested by the FBI and Lizard Squad's twitter was suspended

I'm starting to get annoyed seeing all the Lizard Squad and Finest Squad threads now. It's just silly, do something better with your time.

Losers, peasants, outcasts, social outcasts, virgins, and most importantly they both know NOTHING about computing, especially the black idiot who was telling people to learn how to program..

Finest Squad is absolute shit taking credit for something KimDotCom did.

All they do is wait and then take credit for doing nothing.
