Yeah I was deciding whether to do an eBook or videos. Went for a over an hour video series covering EVERYTHING to make thread designs. Ebooks limit you a bit. It's best to be upfront and direct.

Thanks for the goodluck mate!

Well let's calculate:

You buy these video tutorials with all the resources needed and a step by step guide to making Thread Designs. 9.99 is the cost and it stays that way. That's all you pay.

On the other hand, you need a \$10 to \$20 thread design each time you make anything! You make say 5 products, that's about 100\$ gone to waste!

See what I mean?

(Dec 26, 2014 02:44 PM)Grievous Wrote: [\[CITE\]](#) \$9.99 is cheaper than buying a thread design.. a decent one.

Exactly. I purposely made it cheaper than an actual thread design and besides, this will teach you to make unlimited high quality thread designs that you had no idea how to do before. Idk about you but my version sounds more convenient don't you think, grievous?

People purchase thread services for the convenience, and expertise the designer has. If people want to make their own designs they will.

If you watched the preview video,i will assume you didn't , you see that I cover a lot of areas, not just the thread design aspect. Also read my first text before the video

Also as I can tell from your Rep, you're quite the little art ripper.

Bingoooo, which is why I do not pay attention to those replies.

It does however mean that people making thread designs will be losing a bit of business so I can understand. I GET IT!

So I apologize, but people can decide for themselves what they want.

Buy the tutorials and learn yourself once and forever? or pay for new thread design every single time.

Everyone needs to hop off this guys dick, he obviously knows how to make awesome thread designs and he is selling his knowledge to the general community to make some money and teach people how to make their own thread designs or even sell it. He is passing on his knowledge and trying to make some money at it. Not even that much, 10 fucking dollars, he isn't going to make bank off of this.

I appreciate the kind words McLovin. It's fine, I don't mind people sharing their thoughts about my product. The only annoying ones are the ones who trash on purpose, but I report them so it's fine. I

pay no attention to such things.

It's really about what people want, it's not for sale trashes to decide what others should do. People can think for themselves.

Why are buttons necessary on a thread design? They serve no purpose as they're not.. actually clickable.

?rtist - November 27, 2015, 2:04 am

(Nov 25, 2015 11:45 AM)Mr. Trvp Wrote: [\[CITE\]](#) Why are buttons necessary on a thread design? They serve no purpose as they're not.. actually clickable.

It's because it's a familiar concept, Click2Buy that is, in Online Shops and what not.
That's why it's so commonly used.

There's no Rules in thread designing, you can make it however you wish. With or without buttons.
