Grammar: 10/10

Not a single grammar mistake was present inside the eBook. IT is written in Simple English so one can easily understand the method.

Content: 10/10

The content is excellent. It can earn you an easy \$500 by outsourcing online. You just need to spend a bit of time on Google and all.

Layout: 9/10

5 pages eBook; timely illustrations were provided, but the method was the most stunning one of all.

Overall: 10/10

Overall, the method is extremely unique and used for extreme monetizing.. Perfectly written, smoothly understandable and an excellent eBook overall.

I vouch for this product.

Here's my thoughts on the book.

Also I am a firm believer that scores ruin products.

Grammar -

While it isnt 100% professional and systematic, it is pretty simple to grasp and understand. Its written in plain English and the images help it along.

Originality

It's pretty unique. The chances of this getting saturated for you are pretty near none and thats the best part. Using the steps provided, I havent seen something similar, but is so simple to grasp and understand that you read it and wonder why you didnt think of it yourself sooner.

Difficulty

This all depends on the effort you're willing to put into it. You could do a medicore job, you could do a better job, or you could only do this about once or twice. It doesn't even matter because its honestly just a free untapped market waiting for someone to take advantage of.

Overall

As these are just my first impressions we will see soon how effective the book is. However, judging on what the content is now, you cant go wrong on the price, and to be honest should be charging

MORE for this type of information. (Unless of course this is just posted somewhere which I have no idea exists) Even by implementing the information once can have a return on your investment and more. I can't wait to see a first implementation and future ones as well. I just hope this is as easy as it sounds.

(Jan 12, 2015 09:21 PM)Diclonius Wrote: [\[CITE\]](#) in my honest opinion a noob can easily pull this off

From the creator of Sex Really Does Sell! eBook comes another hard hitting plan on making easy cash!

This isn't a money making IDEA this is a money making PLAN proven.

What is Outsmarted™?

Outsmarted is a method that you can use to make easy revenue where you live. It isn't auto pilot, however the more time you invest the more potential revenue to be had. This method is practically noob friendly, I wouldn't doubt a caveman could do it.

Who do you Outsmart exactly?

The customers! Any successful business owner owns a website am I right? Well, not every business owner is 'computer savvy.' You basically take what they already have, enhance it and sell it back to them for EASY MONEY. It's so legal it should be considered illegal!

How long of a set up time?

5-10 minutes if that!

Applying my method is another story, the more time you put in the more money you'll potentially be making. The better you are at applying my method, the more revenue you'll potentially earn per hour.

Is there a investment?

Yes, there is actually \$10 to be exact.

Why is it only \$15?

Unlike my other ebook, I could release 1000 copies of this and still be able to effectively make money where I live.

Simple small method that will earn you some serious cash and is virtually unsaturatable because you apply this plan where you live!

I'm so convinced that this plan is so unique that NOBODY on HF has introduced this method before!

\$15

Hey just thought I'd share some thoughts on this:

I can kind of guess what the method is without reading the eBook, but I'm still curious to see how you've explained it, and how a buyer will follow the instructions, and for \$5.00 this is a can't miss book, I realize you said only those you deem respected enough to post a HQ review will receive a vouch copy (so because nobody knows me I'm guessing that doesn't include me) but to check out this eBook would be great, good luck with sales.
