Thread: [\[Facebook\] Break The Profile Picture Privacy \[Facebook\]](#)

markzuckerberg - December 27, 2014, 1:02 am

Hello HF,

I don't think there's a simple way to view any profile pic on Facebook with or without privacy!

Automatic : [LINK](#)

OR MANUAL

=====

Let's do it :

1) Go to any profile and copy the username (i don't need to explain on how you can get the username from the web browser address) ?

2) go to :

Quote:[graph.facebook.com](#)

Add the username for example it will be like this :

[graph.facebook.com/username](#)

3) add Quote:/picture?width=2000&height=2000

so all the code it will look like this ? : Quote:

[graph.facebook.com/username/picture?width=2000&height=2000](#)

You're Done! ?

Waiting your Feedbacks!

If you stuck somewhere, post the error and i'll help you out just comment ? ..

This is Facebook Graph API exploitation. Much more can be obtained by advanced manipulation.

You can read people's messages, etc. However it does involve some work as you need to set up an exploit to gain their token.

Yes 100% but its not easy.. thats why it needs work and time to test and bypass some security..

It's not an Exploit or whatever like hacking. it is just Facebook GRAPH API for developer. -,-

btw

Pernille - January 27, 2015, 8:27 pm

There is no privacy policy regarding this. Current profile pictures are ALWAYS public. The link just shows the image in a bigger size.

btw

We all need to see the picture in public not in private.. and facebook do have this privacy settings if you broke it and view it in a large way then it is a hack/exploit it is what it is Graph api, Api graph anything you want but breaking the privacy and viewing it in a large size is an exploit to facebook ?

yes it is normal.. the whole tutorial is for the profile picture only ?

Punkbastard - March 10, 2015, 11:19 am

Wow, didn't expect this to work.

I have my facebook privacy settings very high so nobody without an account can view it and it just loads my profile picture in huge format. Lol.

Thanks for the method

How can i see the other Pictures also?

I mean...I can see the Profile Picture without this trick.

But i would like to see also the other Pictures in the other Folders wich are only visible for friends. Is there an Option?

Krat0s2 - May 9, 2015, 11:51 am

I saw this back then in a forum, I was freaking out man could not believe my eyes. Thanks for the share. Will keep it in mind when I wanna see some hot chick profile hehe.
