I still can't believe people still buy that garbage after it was down for like 3 months. It just looks like they want to make a quick buck considering how many "problems" they're having.

Inb4 "buying new servers/moving to a new host/scanning for lists".

I closed the thread so new users won't purchase and because there are some sales trashers who targeted me. I am waiting for the server to get delivered.. Read my last posts on the thread. Stop sales trashing.

How is that sales trashing? Your product is not working and he is trying to make sure that no one buys it when it isn't working...

Kids on HF have some really fucked up ideas about how business works.

I am sorry but I been trying to even get my package back that I bought on the first source that was up when they opened there was no power even on it at all it was complete shit. I will never buy it again I thought i was going to be good but I was wrong. It just like the rest of shitty booters out there these days. It just open to allow him to make a quick buck.

Booter is a scam now, it used to work pretty good in the past and finally I got a lifetime sub.

They said everyone with life subscriptions will get acces to the new booter but naaaaaah nothing !!!!
Posts on the thread get removed when you give a negative respons and they ban you from posting on the thread !!!

SO DONT BUY BIG BANG BOOTER !!!!
