Thread: [Twitch viewbotting?](#)

Rawwy - December 27, 2014, 3:37 pm

Hi, was wondering if viewbotting on twitch is possible without paying for anything? Doesn't have to be able to fake thousands of viewers, but at least 100 would be nice :)

WeNeedToGo - December 27, 2014, 3:40 pm

Twitch viewbotting is possible, do you mean live views or view count?

botrus - December 27, 2014, 3:42 pm

^^

Sure without paying for anything. People would line up to be able to do this. I'm sorry OP everything that is any good is going to cost u \$\$

The best view botting is going to be via the services out there ie twitchbooster and primetwitch

They are both on the site

Good luck finding a none ratted/virus working twitch tv view bot + the 1000's of working proxies u need and a machine to run it on for free.

Rawwy - December 27, 2014, 4:08 pm

What about youtube viewbotting? ^_^

botrus - December 27, 2014, 4:52 pm

You need good proxies and a good working bot and a bot that gives out HQ views, most botnets do this better then a real youtube bot to be honest

I give out my bot randomly, if the person has been on this site for awhile, so a working, virus free, bot is possible to get (if it doesn't work, someone complains to me within a day).

Proxies are easy to find, if you have the knowledge / time to scrape + check them.

A separate machine isn't necessary either. Not sure how yours is programmed, but 1k viewers would use up ~5% of my CPU. That's at a 1:1 ratio though, so 1k proxies = 1k viewers. Not sure

how many viewers public proxies give using 1k.

But I will agree, a service is best for someone who lacks knowledge in the area, but the prices have increased dramatically.

Indeed they do, but it would be more efficient to get a private bot from a trusted source and use it.

Disparity - December 28, 2014, 11:35 pm

Nearly all the people are very wrong. Try HitLeap. It's slow, but it's free.
