Thread: [4 Tutorials in one thread!](#)

Nasyr - December 27, 2014, 7:47 pm

[MyBB Help Desk](#)

4 Simple tutorials that relate to MyBB.

Show Groups

Spoiler ([Click to View](#))

Firstly create a new file in your root folder named 'showgroups.php'
Edit the file and add the following code and save it.

Code <?php

```
define('IN_MYBB', 1); require "../global.php";
```

```
add_breadcrumb("Custom Usergroups", "showgroups.php");
```

```
eval("\$html = \"".$templates->get("showgroups").\"");
```

```
output_page(\$html);
```

```
?>
```

Now go to your Admin Control Panel > Themes > Templates > Global Templates > and add a new template titled 'showgroups'.

In that template add the following code and save it.

Code </style>

```
<html>
```

```
<head>
```

```
<title>Current Usergroups</title>
```

```
{\$headerinclude}
```

```
</head>
```

```
<body>
```

```
{\$header}
```

```
<table border="0" cellspacing="1" cellpadding="4" class="tborder">
```

```
<tr>
```

```
<td class="thead"><span class="smalltext"><strong>Current Custom  
Usergroups</strong></span></td>
```

```
</tr>
```

```
<tr>
```

```
<td class="trow1">
```

```
<div style="width: 48%; min-height:120px; border: 1px #0E8104 solid; margin: 4px; padding: 2px;  
border-radius: 5px; float:left;">
```

```
<table width="100%" cellpadding="5" border="0">
<tr class="trow1">
<td width="75%" border="0">
<span><b>Usergroup</b></span><br />
<span class="smalltext"><b>Leaders: </b>
  <a href="profile.php"><span style="color: white;">Add username(s) here</span></a><br /><a
href="usercp.php?action=usergroups&joininggroup=8&my_post_key={$mybb->post_code}">(Join
Group)</a><br /><br />Description.</span>
</td>
<td width="25%" align="right" valign="middle">
<br />
</td>
</tr>
</table>
</div>
```

```
<div style="width: 48%; min-height:120px; border: 1px #0E8104 solid; margin: 4px; padding: 2px;
border-radius: 5px; float:left;">
<table width="100%" cellpadding="5" border="0">
<tr class="trow1">
<td width="75%" border="0">
<span><b>Usergroup</b></span><br />
<span class="smalltext"><b>Leaders: </b>
  <a href="profile.php"><span style="color: white;">Add username(s) here</span></a><br /><a
href="usercp.php?action=usergroups&joininggroup=8&my_post_key={$mybb->post_code}">(Join
Group)</a><br /><br />Description.</span>
</td>
<td width="25%" align="right" valign="middle">
<br />
</td>
</tr>
</table>
</div>
```

```
<br>
<div style="width: 48%; min-height:120px; border: 1px #0E8104 solid; margin: 4px; padding: 2px;
border-radius: 5px; float:left;">
<table width="100%" cellpadding="5" border="0">
<tr class="trow1">
<td width="75%" border="0">
<span><b>Usergroup</b></span><br />
<span class="smalltext"><b>Leaders: </b>
  <a href="profile.php"><span style="color: white;">Add username(s) here</span></a><br /><a
href="usercp.php?action=usergroups&joininggroup=8&my_post_key={$mybb->post_code}">(Join
Group)</a><br /><br />Description.</span>
</td>
<td width="25%" align="right" valign="middle">
<br />
</td>
</tr>
</table>
</div>
```

```
<div style="width: 48%; min-height:120px; border: 1px #0E8104 solid; margin: 4px; padding: 2px;
border-radius: 5px; float:left;">
<table width="100%" cellpadding="5" border="0">
```

```

<tr class="trow1">
<td width="75%" border="0">
<span><b>Usergroup</b></span><br />
<span class="smalltext"><b>Leaders: </b>
  <a href="profile.php"><span style="color: white;">Add username(s) here</span></a><br /><a
href="usercp.php?action=usergroups&joininggroup=8&my_post_key={$mybb->post_code}">(Join
Group)</a><br /><br />Description.</span>
</td>
<td width="25%" align="right" valign="middle">
<br />
</td>
</tr>
</table>
</div>
<br>
<div style="width: 48%; min-height:120px; border: 1px #0E8104 solid; margin: 4px; padding: 2px;
border-radius: 5px; float:left;">
  <table width="100%" cellspacing="0" cellpadding="5" border="0">
  <tr class="trow1">
  <td width="75%" border="0">
  <span><b>Usergroup</b></span><br />
  <span class="smalltext"><b>Leaders: </b>
    <a href="profile.php"><span style="color: white;">Add username(s) here</span></a><br /><a
href="usercp.php?action=usergroups&joininggroup=8&my_post_key={$mybb->post_code}">(Join
Group)</a><br /><br />Description.</span>
  </td>
  <td width="25%" align="right" valign="middle">
  <br />
  </td>
  </tr>
  </table>
  </div>
<div style="width: 48%; min-height:120px; border: 1px #0E8104 solid; margin: 4px; padding: 2px;
border-radius: 5px; float:left;">
  <table width="100%" cellspacing="0" cellpadding="5" border="0">
  <tr class="trow1">
  <td width="75%" border="0">
  <span><b>Usergroup</b></span><br />
  <span class="smalltext"><b>Leaders: </b>
    <a href="profile.php"><span style="color: white;">Add username(s) here</span></a><br /><a
href="usercp.php?action=usergroups&joininggroup=8&my_post_key={$mybb->post_code}">(Join
Group)</a><br /><br />Description.</span>
  </td>
  <td width="25%" align="right" valign="middle">
  <br />
  </td>
  </tr>
  </table>
  </div>
<br>
</td></tr></table>
{$footer}
</body>

```

</html>

Then you can edit the code to the appropriate images, users and so on for each of your groups.

Alert Adblock users about adblock extension

Spoiler ([Click to View](#))

This short method will tell members using Adblock to deactivate the extension in their browser. Go to the Admin Control Panel > Themes > Templates > Theme Name > Header > Select who views it.

And then put this code in and save it.

Code <div class="YOUR_CLASS">Alerts! </div> // - You can remove this

<script>

(function() {

var message = "Your Message to Adblock Users!";

var tryMessage = function() {

setTimeout(function() {

if(!document.getElementsByClassName) return;

var ads = document.getElementsByClassName('YOUR_CLASS'),

ad = ads[ads.length - 1];

if(!ad

|| ad.innerHTML.length == 0

|| ad.clientHeight === 0) {

alert(message);

//window.location.href = 'http://comunidade.bf4brasil.com.br/member.php?action=register';

"/" Redirect users to where you want - You need to remove "/"

} else {

ad.style.display = 'none';

}

}, 1800);

}

if(window.addEventListener) {

window.addEventListener('load', tryMessage, false);

} else {

window.attachEvent('onload', tryMessage);

}

})();

</script>

Limit Signature Image Size in kilobyte

Spoiler ([Click to View](#))

Go to your Root > Inc > Plugins > create a file named 'limitsign.php' and save it.

Then edit that file and add the following code.

Code <?php

// Disallow direct access to this file for security reasons

if(!defined("IN_MYBB"))

{

die("Direct initialization of this file is not allowed.

Please make sure IN_MYBB is defined.");

```

}

// Plugin info
function limitsign_info ()
{
    return array(
        "name"      => "limitsign",
        "description" => "limitsign",
        "website"    => "limitsign",
        "author"     => "limitsign",
        "authorsite" => "limitsign",
        "version"    => "limitsign",
        "guid"       => "limitsign",
        "compatibility" => "16*"
    );
}

$plugins->add_hook('usercp_start', 'signsize');
function signsize()
{
    global $mybb, $error;

    preg_match_all("/\[img(?:.*?)\](.*?)\[Vimg\]/i", $mybb->input['signature'], $matches,
    PREG_SET_ORDER);

    $kbsizetot = 0;

    foreach ($matches as $img)
    {
        $kbsize = strlen(@file_get_contents($img[2]));
        $kbsizetot += $kbsize;
    }

    if (($kbsizetot > 350000) && ($mybb->input['action'] == "do_editsig")) {

        $error = inline_error("The sum of the size of the images exceeds the allowed limit of 350kb.");

    }
}
?>

```

Change the value (currently 350000) to whatever you want it to be.
 Additionally enter the error message you want and then save it.

Usergroups legend without using plugins
 Spoiler ([Click to View](#))

To begin with go to this template: Admin Control Panel > Templates & Style > Templates > theme
 of choice > Index Page Templates > index_boardstats.

Find {\$whosonline} and replace with the following but filled in with your groups.

Code <tr>
 <td class="tcat">Usergroup Legend</td>

</tr>

<tr>

<td class="trow1">ADD YOUR USERGROUPS HERE</td>

</tr>

If you are having issues with whos online, readd the code for it which is > {\$whosonline}

holysht - January 13, 2015, 1:16 pm

Yes but how to make showgroups page automatic...

Sakuto - January 13, 2015, 5:33 pm

You should remove the center tag on the code tag, it make the code unreadable. Good job for this tutorial though.

Nasyr - January 13, 2015, 5:43 pm

(Jan 13, 2015 06:33 PM)Sakuto Wrote: [CITE](#) You should remove the center tag on the code tag, it make the code unreadable. Good job for this tutorial though.

It's not really a big deal is it really?

Sakuto - January 13, 2015, 5:49 pm

I love reading code when I see tutorial, the fact that center tag destroy the indentation make the code so disagreeable to read that, in 90% of case, I just leave the thread without finishing my lecture. I don't know if it's the same for everybody, but I find that very unpalatable.
