Thread: [How To Make Youtube Search In VB.NET \[PIC Tutorial\]](#)

SniperWarrior - December 28, 2014, 12:40 pm

Hello buddies

Today I will make a program , which will search on youtube for your keywords using VB.NET.

Lets Start

I think the pictures are enough to explain,

Well, First add Buttontext and TextBox , Follow the below picture:

[img]<http://s25.postimg.org/rqq4xgxbj/image.png>[/img]

Add new class , name it as HtmlWeb.vb ,follow below picture:

[img]<http://s25.postimg.org/y5p5u541b/image.png>[/img]

Now Just go to the design view, Double click on your main FORM1 , you will switch back to the source code view.

Now Just Copy paste the rest of the codes as below picture :

[img]<http://s25.postimg.org/c7sp0cp0v/image.png>[/img]

Now Just Build and Run your program !

Successful

[img]<http://s25.postimg.org/4gbz1skvj/image.png>[/img]

I hope the beginners will get benefit from this. ?

Took me an hour to make this tutorial , it will take you second to keep this thread alive for Beginners .

Edited:

Download Complete Source Code

much simple with

<http://msdn.microsoft.com/en-us/library/system.windows.forms.flowlayoutpanel%28v=vs.110%29.aspx>

RandomUser123 - December 28, 2014, 12:48 pm

I think you should add more comments to make a beginner understand it.

'dichiaro le stringhe :3

Dyslexic - December 28, 2014, 12:49 pm

Good tutorial, will help out those who are learning.

yeah beginners need PIC tutorials to understand things better .

nathan72389 - December 28, 2014, 1:01 pm

nah, youtube grid is much faster and runs in my browser, plus it has never ending pages.

i dont see the point in your project because there is nothing that you can do with the images after you look at them.

you did not even add any code to start the video when the image is clicked, or double clicked.

there is no option to even save the images.

the is nothing more than taking an image from any website and adding it to a flow panel.

you should at least add some functionality to it first.

dear mate ,

I created this tutorial just for basic understanding to beginners .It is just to make them be interested toward vb.net learning ! As i have seen many new comers coming to vb.net to learn Login to some accounts via vb.net . They want to learn how we fetch data from website.So this might help them to understand it for a bit.

However, i am working on this now, i will add functionality to this so that images can be saved, played , searched over youtube !

I will update this thread when it is complete ?

+Haze - December 28, 2014, 1:12 pm

You should really put spaces in your code, as it's all clumped together.

Malcolm???????????????? - December 28, 2014, 1:57 pm

Great for new beginners, but i would recommend either posting the code in pastebin or with code tags.

Or upload the whole project.

Shoot - December 28, 2014, 3:17 pm

nice tutorial bro, i like the concept of doing this. im doing something similar for movies (personal use)

Yes that is great Idea, i am releasing the source code via Pastebin Now !

Thank you alot for suggestion ?
