Thread: [Extrem Leecher v2](#)

mnjx - December 28, 2014, 2:02 pm

Hello Guys i updated my Programm called Extrem Leecher to the version v2 ??

Screenshoots

What does the Programm do?

The Programm leeches User:Pass, Email:Pass or IP:Port from the page source of a url.

Virustotal

[Here..](#)
[.rar](#)

Download

[Zippyshare](#)
[Sendspace](#)

Notice

This is the Alpha version of Extrem Leecher v2 if you have some errors hmu !

Leave me a Comment what you guys think about the Programm and should i add something ?

Shoot - December 28, 2014, 3:04 pm

what exactly does these even do?

when you post something you should explain a little bit

Well you can open a textfile with links in and the programm will leech User:Pass/ Email:Pass or Proxies from every url from the .txt file

RandomUser123 - December 28, 2014, 3:42 pm

What is it supposed to do?

And... when you release something, you're pleased to put as dowload and as virus scan the same unmodified file.

This program

Well you can load all Websites you want :) The Programm automatic leeches all from the Website Source Code in this following format.

username:password

testemail@gmail.com:password

127.0.0.1:8080

TDIAL - May 27, 2015, 10:45 am

Thanks mnjx, working perfect!

Ninja - May 27, 2015, 10:49 am

Please fix the GUI, as, to be honest, it looks horrible. Also, add an option to save to TXT and maybe to check the proxies. Also, multithreading wouldn't be too bad.

CodeAssassin - May 27, 2015, 12:21 pm

Nice idea i know a lot of users here are into this sort thing, I am interested in what method you choose to get the results?

Are you using Regex, or split strings?

Thanks :)

Fr?sh - May 27, 2015, 12:22 pm

this is pretty cool

might use this man

cooh - October 10, 2023, 2:17 am

? nice work

Local Celeb - October 13, 2023, 11:59 am

Hey, post the source & let the people learn a little eh? Open source the knowledge.

Yeah, unfortunately. It would be nice to see this section pop up with some more source dumps like there used to be.
