Thread: [Bitlocker bypass without recovery key?](#)

mr.mouse77 - December 28, 2014, 6:58 pm

Does anybody know if it possible to bypass bitlocker without the Recovery key?cause im trying to fix this lady computer but every time her computer boots up bitlocker pops up and stop me in my tracks and i cant continue

Aura - December 28, 2014, 7:01 pm

Why don't you ask her the BitLocker password? Simple as that.

Canonsx130 - December 28, 2014, 7:52 pm

I'm not sure whether this is strictly whitehat. I'd suggest you to google around a bit. There are few methods out there which will help you do what you are trying to do.....

I think this is why:

Quote:without the Recovery key?

Maybe the lady forgot the Bitlocker key....

People often over complicate things.

Honestly, if you don't have access to a password or key to access encrypted, secured data. It's probably because you're not meant to access them. I don't know any exploits to BitLocker too.

Getitngongetit - April 17, 2019, 2:18 am

I have the same issue and I am supposed to be able to access it because it belongs to me. However after having spinal surgery then a pituitary biopsy my memory has basically become a garbled index of fiction and maybes. I have even contacted the company because I was registered all to no avail. So I have a \$1k paper weight

biopsy my memory has basically become a garbled index of fiction and maybes. I have even contacted the company because I was registered all to no avail. So I have a \$1k paper weight I doubt your disability prevents you from seeing that this is a thread from 2014! The point of encryption is security and privacy. If you forget the key, tough. It's doing the job you signed up for.
