Thread: [What web host for Dendroid?](#)

abratar - December 29, 2014, 9:08 am

So as the title says, im searching for a web host that allows dendroid or in other words that the host doesnt detect dendroid on their server... i already tried square7 and 3owl .. both doesnt work...

Rolex? - December 30, 2014, 11:23 pm

Go to the Marketplace and go to web hosting or you can go to Webmaster and Hosting. Any of those servers will work for the most part unless it explicitly says that botnets and such aren't allowed.
