Thread: [Make Money By Copy & Pasting. How? READ ME! \[NO PM's/Refs\]](#)

ICUP - December 30, 2014, 5:15 am

Hey,

I figure out I'd give something back to this community. You do not have to PM me nor click my referral link because there will be none. (I DESPISE THOSE PEOPLE). To keep it short and sweet...

I used to do this before but since it's not a stable income, I had to step away from it.

So basically you find a \$1 service on: [adollarseo.com](#) or [seoclerks.com](#) then you resell that service on Fiverr. You simply copy & paste though I recommend you change it to make it more unique. That simple. Enjoy! :)

That's actually a pretty solid method! How much did you make every week or month using this method (just a question)?

Is there anyway for you to elaborate a bit on the method? Maybe a step by step?

Tried this a couple of times and it worked great. Just make sure you find reliable sellers on seoclerks

Hi,

I will edit this post tomorrow with more details. :)

Exactly, I recommend looking for someone who has good reputation on seoclerks before reselling their products.
