Thread: [Anyone banking with something except kik?](#)

keysikg - December 30, 2014, 5:47 am

I see that there are few methods around here. I made almost 400\$ in 3 days since i started ewhoring, but I am using only kik. And I feel like every new session there is less traffic than before.

Is anyone using other methods except kik and banking? I could really use some tips on what is working atm. I really have dedication for this and its going great, I actually enjoy doing this :)

With my method I have done double in one day that you did in 3... but my problem is the dedication part. I have no idea how anyone enjoys pretending to be a chick and talking to complete morons. I'd rather go dig a ditch for 12 hours than ewhore that entire time, it's just humiliating and a chore. I feel my manhood disappearing every time I do this

And no-one with half a brain here will share their GOOD methods, including me (though I'd gladly share my method with you if you can gift me your dedication and enjoyment lol).

My best tip to you is to think outside the box. If the crowd is going left, go right. You can take the concept of catfishing and come up with so many ways and sites and programs to use. Don't just do the shit you read here or you'd be severely limiting yourself. Test different stuff out, trial n error

First, thanks for responding. If you did 800\$ in one day, and you don't enjoy and absolutely hate doing this, why wouldn't you share it with me for example? I have dedication and I enjoy doing this. No matter what it is, it can't get saturated from 1 extra guy, not even 100. I am trying to think outside box for this, but really can't get it done.

Actually I've tried acting like a 15 year old girl once and to my surprise I didn't make a single sale. The men were like "I'm not buying nudes from a 15 year old"

Manual ewhoring is so mainstream. Switch switch switch

I hate it, but still do the bare minimum work to pay bills and have some extra to work on something else that isn't this disgusting to make money.

And one guy is enough to ruin the pool if he doesn't do it right. Gotta be phenomenal in SE to pull off what I do. It's not like I could write down the method in 2 sentences. There's A LOT of nuances.

No hate, but get creative..."can't" is a sorry excuse. I downloaded a lot of paid ebooks using google to get ideas, then mixed a few, browsed other forums, combined things etc... of course you won't get any new ideas by just staring at this forum with a blank stare

If I could come up with my own method, anyone could

Edit: Though, I am thinking of maybe selling it in the future to say 5 people and train them to do this and teach them, basically hold their hands through getting traffic and converting it to having the cold hard cash in your hands. But the price would be high, if I'm moving on to something I like more, I'll do this... I'd probably be the first person to actually teach people to make bank lol. There's A TON of horrible "mentors" and shitty expensive ebooks out there

Easy to talk about 800 dollars on 2 days when there is no payment proof :)

What kind of proof and why do I need to prove it to you? Not gonna bother with it, but I would video

record proof if I were to sell it, screenshots can be faked.

Since I'm not selling it anytime soon, no reason to do it. Don't like it, call me a fake and move on.

Still, I wish you good luck OP. Don't take my posts as hate or brag. I use to make pennies with saturated methods on these forums. Someone told me the same thing that I'm telling to you, make your own method/traffic source and you will bank. No-one will give their money making methods away for free, unless they don't bring any money in
