Thread: [Pokemon Web Component - Free to use however you like](#)

Tasemu - December 30, 2014, 5:57 am

Here is another random web component I made. Just include polymer in your webpage and then put this code into your header:

Download / View on github!

<https://github.com/Tasemu/pokemon-info>

Code `<link rel="import" href="/path/to/pokemon-info.html">`

Now just use the new `<pokemon-info name=""></pokemon-info>` tags you have available to generate any pokemon you want. Credit goes to passy for the original idea I based this off :)

Example Use:

Code `<pokemon-info name="charmander"></pokemon-info>`

`<pokemon-info name="charmeleon"></pokemon-info>`

`<pokemon-info name="charizard"></pokemon-info>`

Result:

Crypto™ - December 30, 2014, 9:33 am

Nice job :) is this a polymer component?

Tasemu - December 30, 2014, 3:30 pm

Yep, you can have a squiz through the source on github. Its not big. :)

edit: oh shit i never linked the github!

Trapcode - December 30, 2014, 9:34 pm

Nice work man, Really appreciable :)

Tasemu - December 30, 2014, 10:25 pm

Cheers, it makes it all worth it when people reply on the thread. :)

Might make a pokemon card generator next... O.O

Ordium - December 30, 2014, 10:26 pm

Out of curiosity, how do you think this could be used? I have no desire to use it, was just wondering why you decided to choose this of all things.

Vip?r - December 30, 2014, 10:30 pm

Looks pretty cool although I'm not sure what it could be used for.

Edit: looks like I had the same idea as the user above.

Tasemu - December 31, 2014, 12:08 am

Oh man, I didnt honestly think about what it could be used for. Its just a fun proof on concept thing.

Im gonna turn it into a pokemon card generator soon, that could be used for loads of things. ^^

Graybyte - *January 1, 2015, 3:03 pm*

That's pretty awesome dude!

I was thinking about making some pokemon guides on my webpage. If I use these I will link to my page so you can see them live.

Tasemu - *January 1, 2015, 8:39 pm*

Oh please do. Would love to see these used somehow. Edit them however you like to make them fit.
^^
