Thread: [IMacros Scripts for YouLikeHits \(new\)](#)

hdaackda - December 31, 2014, 5:09 am

EDIT: I CANT POST LINKS! HOW DO I GIVE LINK FOR THE SCRIPTS & WEBSITE?

(I also have latest working scripts (checked on 31 dec 2014) which I updated myself for AddMeFast! All Scripts.. Lemme know if I should post them as well!)

I have made 2 scripts for YouLikeHits (another site like addmefast but more complex and difficult to write script, hence there are more genuine users on YLH instead of BOTS. Also they dont add Empty accounts, meaning you should have atleast 3/4 posts, 3/4 friends and profile pic in the fake and/or real accounts you add! (hence even greater chance of real followers!)

At present I have made Twitter Follower & Instagram Follower scripts. I will ADD more (in a day or two depending on likes.. do tell which you need first) to cover the whole website!

Pls give some LIKES :D

I am assuming you already know Imacros & its integration with Firefox (if u dont, u can ask, no issues)

Script & Steps are below

Download Script (zip file.. contains 2 scripts at the moment)
link to zip file

Step 1.

Goto: link to site [remove the space] and register (can be fake but email activation required)

Step 2

Add your Twitter, Instagram, Facebook etc etc profiles.. Keep Coin Per Click to 0 (except the profile you want to increase. Keep it ideally to 5.. (2 is too slow, but max followers... 10 is really fast but few followers)

Step 3

Run YLH Insta script (loop 50 etc)

Run TLH Twitter script.. See your coins JUMP!!

Also, after 50 follows, you can also click YLH-> FREE POINTS -> CLAIM FREE DAILY POINTS (for extra 150 coins!!)

TADA

Pls don't forget to like.. and tell which other script should I work on next... (Any site Any activity!)

Happy Leeching :D
