Thread: [Computer full of viruses and adware](#)

N3wb Gamer - December 31, 2014, 9:38 am

Not sure what I should do at this point. I do have logs from FRST and Security Check programs

Aura - December 31, 2014, 9:39 am

We don't do FRST logs here, you should only give them when asked by an ex-MRT member. Follow the instructions:

[\[BHCPU\] Program/Software advices and recommendations Help Desk](#) by [Aur?](#)

Wait for me, and me only to reply to your log.

AAE32 - December 31, 2014, 9:44 am

OP if you want i can assist you via teamviewer also. I'm not home at the moment tho.

Aura - December 31, 2014, 10:03 am

OP's computer is crippled with junkwares, browser hijackers, PUPs and adwares. Even a backdoor-trojan at some point. Listed him all the programs to uninstall in my thread then told him to tell me once this is done. For now, nothing have to be posted in the current thread.

AAE32 - December 31, 2014, 10:09 am

Wait for me, and me only to reply to your log. Is it this what you mean? Remote Desktop Access (VuuPC);

Aura - December 31, 2014, 10:10 am

(Dec 31, 2014 11:09 AM)AAE32 Wrote: [\[CITE\]](#) Is it this what you mean? Remote Desktop Access (VuuPC);

Yes. It's been flagged as a backdoor-trojan before, detection didn't change last time I checked.

Hug- - December 31, 2014, 1:41 pm

I had the same problem.

I fixed it though,

What I recommend and will mostlikley fix it:

Install Anti-MalwareBytes scan it twice if you want to.

Install Microsoft Security Essentials (Still is helpful) sand if you want to or feel like you should scan twice

Install CCleaner let that run with all the stuff it has for registry evnets/class whatever lol/

Install Avast (If you want to, but try the first 2 first!) and scan.

If you still have a slow computer chcek your startup list with CCleaner

and if you really need to, install JetClean @ <http://www.majorgeeks.com/files/details/jetclean.html>

Get a taskmanager such as Proccess hacker. Check your proccess list check all prcesses that are ran by your username not system.

There are many ways to fix these types of problems. I can help more if you still have problems @ PM

(Dec 31, 2014 02:43 PM)AAE32 Wrote: [\[CITE\]](#) Go Go Go Go to your cave. OP dont listen to this guy. What?

What do you mean.

I listed many programs that can help remove Malware, Viruses, Adware, ect.

What the fuck?

Hug, before you post like that, send me a PM here or on Skype and I'll tell you if it's worth posting or not okay? ?

Meanwhile, I got this under control, no need to post in that thread. Thank you.

AAE32 - December 31, 2014, 1:45 pm

What the fuck?Installing 2 antiviruses can casue system conflicts. aslo make to many scans at the same time wont make any diffrence its just a overkill.

Hug- - December 31, 2014, 1:45 pm

Okay..

I don't know what I did wrong but okay.

And yeah I know you do I just watned to help ?

(Dec 31, 2014 02:45 PM)AAE32 Wrote: [\[CITE\]](#) Installing 2 antiviruses can casue system conflicts. aslo make to many scans at the same time wont make any diffrence its just a overkill.

Yes but you can install them scan ONE AT A TIME (What I meant.. sorry about the confusion) and then uninstall.

and overkill is good when its agents viruses.

Would you rather not overkill and get a PC infected with rats/keyloggeers?

I didn't think so.

Aura - December 31, 2014, 1:48 pm

There's a correct way to help, and there's many, many wrong way to help. The way you did enter the latter category. Hence why we are "picky" on the people we choose to trust here.

Hug- - December 31, 2014, 1:49 pm

Ahh...

I can understated that.

Sorry about that I wasn't meaning to.

Aura - December 31, 2014, 1:50 pm

I didn't think so.It takes to much time. No overkill isnt good scanning to much with the same

software wont make any diffrence since its not gonna find anything since you already scanned 1 time already. 1 scan per software thats it.

Hug- - December 31, 2014, 1:51 pm

(Dec 31, 2014 02:50 PM)AAE32 Wrote: [\[CITE\]](#) It takes to much time. No overkill isnt good scanning to much with the same software wont make any diffrence since its not gonna find anything since you already scanned 1 time already. 1 scan per software thats it.

I know.. I shouldn't of said "4" times because yes that is way overkill.

But sometimes it is good to do it twice.

Aura - December 31, 2014, 1:52 pm

(Dec 31, 2014 02:51 PM)Hug- Wrote: [\[CITE\]](#) I know.. I shouldn't of said "4" times because yes that is way overkill.

But sometimes it is good to do it twice.

If a scan didn't detect an item on the first scan, it won't detect it on the second. The only time where this applies, is when you do a scan with a reporting tool, where it's precise enough to see if something changed or not.

Hug- - December 31, 2014, 1:53 pm

I believe I only said it because I have to scan multiple times with CCleaner and got confused.

Aura - December 31, 2014, 1:55 pm

(Dec 31, 2014 02:53 PM)Hug- Wrote: [\[CITE\]](#) I believe I only said it because I have to scan multiple times with CCleaner and got confused.

CCleaner requires two scans (when using it to clean temp files and folders): one scan to "analyze" and find the content to be cleaned, and a "clean" scan to clean what has been found during the analyze scan.

Hug- - December 31, 2014, 1:57 pm

When I'm sccanning registry if I scan once it finds stuff and if I do it 1-3more times it still does.

I just got confused with what programs do what / ..

Aura - December 31, 2014, 2:00 pm

Never use Registry Cleaners. They are harmful and won't solve any problem that you might be having.

AAE32 - December 31, 2014, 2:01 pm

Like Aura said they can even create BSODS problems.

Hug- - December 31, 2014, 2:01 pm

(Dec 31, 2014 03:00 PM)Aur? Wrote: [\[CITE\]](#) Never use Registry Cleaners. They are harmful and won't solve any problem that you might be having.

I use the CCleaner one. But yeah I know.

I don't really have any problems anymore I just do it every once in a while.

Aura - December 31, 2014, 2:01 pm

(Dec 31, 2014 03:01 PM)Hug- Wrote: [\[CITE\]](#) I use the CCleaner one. But yeah I know.

The CCleaner Registry Cleaner is one of the worst too, haha. There's no need to, you gain absolutely nothing out of it.

Hug- - December 31, 2014, 2:04 pm

(Dec 31, 2014 03:01 PM)Aur? Wrote: [\[CITE\]](#) The CCleaner Registry Cleaner is one of the worst too, haha. There's no need to, you gain absolutely nothing out of it.

I know. I only do it sometimes.. lol

I know that but I still do it.

Aura - December 31, 2014, 2:05 pm

(Dec 31, 2014 03:04 PM)Hug- Wrote: [\[CITE\]](#) I know. I only do it sometimes.. lol

You should stop doing it lol, just in case. You either do it and get nothing out of it, or do it and eventually break your system. There's no "win" situation here, haha.

AAE32 - December 31, 2014, 2:05 pm

(Dec 31, 2014 03:04 PM)Hug- Wrote: [\[CITE\]](#) I know. I only do it sometimes.. lol

I know that but I still do it. My question. Why the are you doing it lol?

Hug- - December 31, 2014, 2:06 pm

(Dec 31, 2014 03:05 PM)AAE32 Wrote: [\[CITE\]](#) My question. Why the are you doing it lol?
no reason. I know it doesn't even cleanup 1byte and doesn't speed up my system at all no win at all idk why but I still do it

Aura - December 31, 2014, 2:13 pm

(Dec 31, 2014 03:06 PM)Hug- Wrote: [\[CITE\]](#) no reason. I know it doesn't even cleanup 1byte and doesn't speed up my system at all no win at all idk why but I still do it
Then stop doing it and it'll stop this discussion ?

Hug- - December 31, 2014, 2:14 pm

(Dec 31, 2014 03:13 PM)Aur? Wrote: [\[CITE\]](#) Then stop doing it and it'll stop this discussion ? Okay lol...

I really got everyone offtopic

AAE32 - December 31, 2014, 2:18 pm

Also. How is it going with OPs PC Aura? is it sloved yet?

Aura - December 31, 2014, 2:18 pm

(Dec 31, 2014 03:18 PM)AAE32 Wrote: [\[CITE\]](#) Also. How is it going with OPs PC Aura? is it sloved

yet?

I would say that it's 75% complete. Waiting for it to comeback to me with an answer to my question and I continue. But this thread is done for it.

AAE32 - *December 31, 2014, 2:20 pm*

Alright then. Thread can now be closed or ignored by ohter users.
