Thread: [\[DoS\] Python DoS script bugs!](#)

ZeekoSec - January 1, 2015, 3:34 am

Hello HF ~

My friend made this python script..

i dont know how to get it to work Blink

...but maybe some of you who know python a little better than me could help

i've put the code on pastebin

pastebin . com / raw. php?i=q6GDC9ez

Thanks in advance ! <3 :)

Um can you please provide more information please? Like what errors are you receiving, where are you deploying this, etc?

ZeekoSec - January 2, 2015, 7:21 am

kraxyk - it's just messed the f#ck up

In what way? It looks like all the core functionality is there.

ZeekoSec - January 2, 2015, 7:49 am

kraxyk - i know.. i've tried to run it.. but bugs.... bugs everywhere!

Mouse? - January 2, 2015, 8:15 am

There are no bugs. There are tons of syntax errors. It won't run because this was coded incorrectly.

Ya exactly, I agree. Perhaps you should try recoding it yourself with the help of some resources. Plus that way its a good learning experience.

I dont know how to !? :) sorry im a noob at python..

but if any of you guys could get it running.. i would get so freaking happy :)

Well dont ask us to do the work for you. Tell your "friend" to fix the script for you.

ZeekoSec - January 3, 2015, 12:52 pm

Helios... Dont u think my friend would fix it if he could... Mad!?
