Thread: [\[ICONS\] Steal icons of any executable you want!](#)

La Cocaina - January 1, 2015, 4:20 pm

Hello everyone,

I've seen several users having issues with this.
So I thought, why not explain it.

Requirements:

- An executable where you'd like to get the icon of.
- [This program](#).

Step 1:

Download the program and install it.

Step 2:

I'll be using the skype setup thingy as an example.
Do the following as the screenshot says:

It will look like this:

Spoiler [\(Click to View\)](#)

Step 2:

Select the folder "Icon", open it, go to the folder named: "1", open it and click the file.
It'll look like this:

Step 3:

Go to action, and press "Save Icon."

Result:

Good tutorial you got here :P

I'm gonna bookmark this for future use :)

Nice way to get the original icon(makes your stub look more authentic as well) of program rather than trying to find it online

jhoncarbnt - April 14, 2015, 6:58 am

thanks alot man its worked like charm
