Hey guys, you in need of an Amazing Windows/Linux/CentOS/Ubuntu VPS?

I discovered an absolute way to get an abundantly fast VPS, along with Windows 2012 R2 preloaded onto it.

To get the deal go here: [http://www.\[censored\].com/](http://www.[censored].com/)

After you do that, sign up with your email. Then use this promo: SSDVPS (Gives you \$35 credit), now add \$5 onto your account via PayPal. And there you go, \$40 credit ready to use. You may purchase a VPS for \$19 a month, and you'd get 2 months free.

Proof:

Enjoy.

Invalid gift code? Maybe it's for US only?

iReFuSe2LoSe - January 2, 2015, 8:17 am

Might be for USA only, you can try using a VPN and it should work.

howdareyoukitty - January 2, 2015, 11:32 am

I'm in the US, Doesn't work for me says invalid gift code.

iReFuSe2LoSe - January 2, 2015, 12:43 pm

What are the benefits of using a service like this. I'm a bit confused as to how it works fundamentally. You post a picture with a download speed of 379 MB/S. That seems insanely fast for internet. I understand that it's a cloud service where you can upload files and whatnot to [censored], but I'm more interested in the internet speed.

iReFuSe2LoSe - February 15, 2015, 11:25 am

The benefits are having a great price, and a very stable VM, with numerous amounts of items, and that is incredibly fast. It all depends on the package you buy, if you want a better internet speed then buy a higher package.

Unbeatengiant - February 16, 2015, 7:39 pm

Gonna go buy one right now, thanks for the share :)
