I made it quickly and it looks pretty decent. It's my first flat theme and I'll probably add more features in a near future.

Kind words are always appreciated, ?

Looks really nice one of the best new themes I seen in a while. Only thing that would make it better is adding more controls.

another clean theme.. hope it also gets completed.

Maybe you can add controls for Alerts, label, progress, panels, etc, just like the elements here:
