Thread: [\[Best Crypter on HF\] 1 KB Stub | Broad Crypter Limited Edition \[Official Version\]](#)

PoisonKnife - January 3, 2015, 3:46 pm

Broad Crypter Informations

- Able to Crypt ".exe" or ".dll"
- Builder Language: VB6 with InLineASM
- Able to Crypt Most Native Application
- Able to Crypt VB.NET / C# Application
- Private RunPE (Coded in ASM)
- Full Unicode Support
- Supports x86 & x64
- RC4 Encryption
- EOF Support
- 10 Custom Injections
- 9 Resources types with Flag Control
- Treat Section as Relocation or Debug
- Icon changer from File or Custom Icon
- Version Info Cloner (.exe | .dll | .ocx)
- Delay Execution
- Code Complexity
- Pre Mutation Code
- Compatibility Mode
- Two Calling Methods
- Multi Storage Methods.
- Server Sided Anti Sonar
- Able to Create New Section
- Anti VMware
- Realign PE
- Startup
- UPX Compression
- Free Scan4you Scanner
- File Pumper 1kb-10000kb
- Null All or Last Section Name
- Skids spoof extension crap
- Binder with an option to run only once
- Delay execution til' next restart
- Anti Memory Scan (See below for the video Demo)

Broad Crypter 1kb Stub Test

<http://www.youtube.com/watch?v=R0LOqZB5glM>

Stub Sizes (Different Prices)

- ASM (6kb-25kb) Custom Stub
- C++ (10kb-100kb)

Screenshots

Pricing

Contact me for the pricing.

Payment Accepted

NOTE:

If you have windows 8 and you don't have vmware installed and doesn't know how to obtain nor install one.

I refused to do any work, until you manage to get one.

Low Class Stubs:

Delphi big for \$350

Delphi Small for \$400

Vb6 for \$300

For quality Stub language (limited and contact me for further details and pricing)

C++

ASM

Monthly Subscription.

No Invitation needed for these low class stubs.

For Sales / Support Contact:

broadsupport@jabber.ru

yamoney - January 3, 2015, 4:13 pm

Nice to see no invitation is needed for the low class stubs, very trusted and old crypter.
Goodluck with sales.

PoisonKnife - January 3, 2015, 4:17 pm

Thank you for your support ?

Broad Crypter is the best crypter out there and it's being sold here on HF :)

Contact us if you got any questions or if you want to make an order.

ron3y - January 3, 2015, 7:42 pm

is the crypter payment per month? how much?

Wardow - January 4, 2015, 12:45 am

Nice to see this crypter comming back on HF !

Vouch for The Old Warrior, Good Job, Don't hesitate to buy this, if you're a noob go away, this is a Private Crypter used for Massive Purposes!

N3oNight - January 4, 2015, 12:46 am

one of the best Crypter over here but also the most expensive on.

PoisonKnife - January 4, 2015, 1:09 am

Holy shit this is expensive. Welp, gl with sales though m8!

PoisonKnife - January 4, 2015, 1:27 am

(Jan 4, 2015 02:11 AM)?Marshm all0w Wrote: [\[CITE\]](#) Holy shit this is expensive. Welp, gl with sales though m8!

When you look at the prices, you could get the feeling that this is a one hell expensive crypter - but this crypter is able to crypt an entire botnet of maybe 400K files and keep it FUD for a whole month without any problems.

When you look at it that way, then the price is fair.

Thank you for the kind words! :)

hahalera94 - January 4, 2015, 3:15 am

5 years old crypter and it gets better by age.

SilverLight - January 4, 2015, 5:30 am

nice to see it back again from my nigga TOW lol i miss him , old friend of him.

Not possible. Once your crypted file reaches target computer, the AV Companys already have it. They analyse it based on popularity. If 400k machines had an unknown file, they would analyse it right away and it would get detected within a couple hours.

This is the reason why most crypters here are FUD for weeks, its because members here don't have big botnets.

However, since this crypter has an advanced USG(possibly the most advanced on HF, since TOW is not stupid) it would most likely take a simple recrypt to be FUD again.

I understand this is HackForums and everyone talks trash just to market your product but there is no need to spread heavy lies that any individual with knowledge will see.

PoisonKnife - January 4, 2015, 9:51 am

The AV companies can't tag it.. They can only tag some unimportant junk codes which are replaced immediately.

In 5 years no one have complained about this crypter. Some even paid 1k+\$ only for an invite to get in and that mean they still have to pay for the crypter!

Broad Crypter is the best crypter on the market today and it can easily keep an 400K botnet FUD.

Miki - January 4, 2015, 10:14 am

Best crypter? Somehow I don't think so, don't false advertise thanks when you just posted this thread.

PoisonKnife - January 4, 2015, 10:41 am

(Jan 4, 2015 11:14 AM)Miki Wrote: [\[CITE\]](#) Best crypter? Somehow I don't think so, don't false advertise thanks when you just posted this thread.

It's been running 5 years privately - and it's still not open for every skid.

We carefully choose our customers. That's why we have an invite system.

Don't talk without knowing the facts.

iamskid - January 4, 2015, 2:07 pm

Broad Crypter is the best crypter on the market today and it can easily keep an 400K botnet FUD. This crypter uses a Stub which already removes "THE BEST" title from it because a better crypter would rebuild the PE. Another thing is that it uses Junk code.

Broad Crypter sure is FUD, but without constant recrypting you won't keep 400k botnet FUD without bootkit. Its just not possible.

I am not sales trashing, believe me, no one on this forum can code a crypter that rebuilds PE and is constantly FUD because it is a fairly advanced task, but there is no need to false advertise.

Without recryting, you will get detected. Its a fact, not opinion.

This crypter probably is the best on this forum but not THE BEST.

Wardow - January 4, 2015, 2:15 pm

(Jan 4, 2015 03:07 PM)darkstrike420 Wrote: [\[CITE\]](#) This crypter uses a Stub which already removes "THE BEST" title from it because a better crypter would rebuild the PE. Another thing is that it uses Junk code.

This crypter probably is the best on this forum but not THE BEST.

This is THE BEST crypter, TOW is doing the best job possible on a crypter, and Miki, the crypter is

up since 5 years, it's not JUST posted.

iamskid - January 4, 2015, 2:31 pm

(Jan 4, 2015 03:15 PM)W????? Wrote: [\[CITE\]](#) This is THE BEST crypter, TOW is doing the best job possible on a crypter, and Miki, the crypter is up since 5 years, it's not JUST posted.

I know its not just posted dude. I know TOW is a good coder but this crypter is not near "THE BEST". The best on this forum without doubt, but not "THE BEST". Dude, it uses junk and stub, how can it be the best.

@PoisonKnife Thanks for the negative, but we both know that FUDing 400k botnet without constant recrypting is impossible unless your malware has bootkit. Anyone who has even the slightest knowledge in the scene knows this and those who don't cant even afford this crypter so why false advertise?

PoisonKnife - January 4, 2015, 2:32 pm

(Jan 4, 2015 03:07 PM)darkstrike420 Wrote: [\[CITE\]](#) This crypter uses a Stub which already removes "THE BEST" title from it because a better crypter would rebuild the PE. Another thing is that it uses Junk code.

This crypter probably is the best on this forum but not THE BEST.

Simple, just recrypt. If you are smart enough you update blocks of 25k bots. It mutates each crypt. Since it is only Poly build, not Polymorphic each run.

iamskid - January 4, 2015, 2:34 pm

(Jan 4, 2015 03:32 PM)PoisonKnife Wrote: [\[CITE\]](#) Simple, just recrypt.

This is what I have been saying. I mentioned that his crypter has probably the best USG on this forum. So why the negative? Its not like I bashed TOW's product(I even said its the best on this forum), U just were claiming that this crypter will never get detected(that recrypting will never be required) which is incorrect.

PoisonKnife - January 4, 2015, 2:39 pm

(Jan 4, 2015 03:34 PM)darkstrike420 Wrote: [\[CITE\]](#) This is what I have been saying. I mentioned that his crypter has probably the best USG on this forum. So why the negative? If it was poly each run... it will last so long that no one would renew their license. No one can afford that.

The Old Warrior - January 4, 2015, 3:22 pm

I would like to check your best crypter. Let me reverse it.

Now, using stub and junks in stub doesn't mean it isn't great.

Broad Crypter has been around for 5 years without getting raped by AV companies.

Do you know why?

Because they only detect the Junk codes, and not the actual Code.

Now If you were a coder and you have two Choices?

Have only real codes inside the stub and get them codes detected.

O

Use Junk codes and have them detect the junk codes.

And for your information. I can easily make this crypter crypt without using a stub.

But why would I do that? So the user can abuse and possibly do a crypting service?

Making stubs only takes 3-5 mins.

In fact just so you know. I can make "ANY .EXE" and turn them into a stub with my 3 lines codes.

It isn't impressive by Who cares if people aren't impressed?

The fact is, it will make my life easier.

Why tackle all the hassles when i can simply sail smoothly.

I would like to test your Great Crypter Against AV and I would to Reverse it.

Just leave me your Crypted file (dummy or bot)

And If you want mine. I can simple give you a crypt as well.

Once I gave you mine. You can put your analysis here and I shall do the same.

Best Regards,

The Old Warrior

I have not finished mine, but I would not mind calc.exe crypted. I am actually interested to how you handle proactive defenses.

(Jan 4, 2015 04:25 PM)PoisonKnife Wrote: [\[CITE\]](#) Where do I write "a single crypt" will last a month?

ATM you are sales thrashing - Please leave my sales thread.
The problem is you don't write "with reencrypting" thats why it automatically implies with single crypt.

PoisonKnife - January 4, 2015, 3:42 pm

(Jan 4, 2015 04:38 PM)darkstrike420 Wrote: [\[CITE\]](#) The problem is you don't write "with reencrypting" thats why it automatically implies with single crypt.

The problem is you don't know what you're talking about.
Get out of my sales thread.

The Old Warrior - January 4, 2015, 4:01 pm

Then we will talk when you are done with yours.
Otherwise, keep working.

I don't claim to be the best. But I am above average of all these crypter around.

I don't just code. I reverse AV's and write my code.

Just so everyone knows.

This non-great crypter can only handle these stubs language in one builder.

- asm
- c/c++
- delphi
- vb6
- autoit
- purebasic
- and many more if I wanted

I would like to see anyone who can do this and that includes "darkstrike420"

if you checked my friend crypter have very unique USG stub stay fud for 1 month and why ?
because of very priv8 encryption codes
same crypted file scanned 10 times still FUD. [autoit & fud compression]

but he is banned , you can check it in the cryptography section

Prince of Persia - January 4, 2015, 11:02 pm

Why would I code a Stub in 50 languages? In any other thread I would say this is fail marketing but you're above the average member on this forum so I want to hear your reason.

I prefer using ASM for Stub.

(Jan 4, 2015 11:56 PM)T??! Wrote: [\[CITE\]](#) because of very priv8 encryption codes

This is not the reason. You can use any public code you want in a crypter, you just have to break

their signatures for scantime FUD. For runtime you need a non-detected injection method, this reply got me wondering.. TOW are you using RunPE? xD

SilverLight - January 5, 2015, 4:23 am

lol . TOW answer him ? i don't think.

iamskid - January 5, 2015, 5:55 am

(Jan 5, 2015 06:36 AM)Conqueror Wrote: [\[CITE\]](#) Stop saying bullshits about runpe if you didn't ever tried another method. Months ago we made like 2 months of full test :

Classic RunPE technique (CreateProcess+VirtualAllocEx + WriteProcessMemory + UnmapViewOfSection+ResumeThread method)

Packers method: (just VirtualAlloc+LoadLibrary used, no extra processes created)

results: both methods were detected in SAME WAY on runtime.

tested on:

AVG

Sonar

Kaspersky

If you dont know any other way of injecting PE then that is totally your problem.

<http://www.#.com/2014/12/zombie-processes-as-hips-bypass.html>

Look at this article for some copy+paste code. Inb4 100 new runpe'less crypters. But yeah, every crypter that uses RunPE is trash. (Woops, did i really just attack 99% crypters on this forum? I am sorry.)

Wardow - January 5, 2015, 6:28 am

(Jan 5, 2015 07:26 AM)darkstrike420 Wrote: [\[CITE\]](#) You give negative to me but not conquerer even though we both talk offtopic here? LOL u totally got angry coz ur shitty crypter uses runpe too, nice abuse bro, nice kid.

Go code more fail autoshit crypters bro :)

I am maybe using RunPE but i bypass all avs...

go away it's BroadProduct Sales Thread, use PM if you want discuss with someone lol!

iamskid - January 5, 2015, 6:45 am

(Jan 5, 2015 07:28 AM)W????? Wrote: [\[CITE\]](#) I am maybe using RunPE but i bypass all avs...

Not at runtime you dont. At runtime your crypter is detected by every HIPS because every HIPS detects the following combination: VirtualAllocEx + WriteProcessMemory and every RunPE uses it. Oh and you use SetThreadContext which is detected by everything, everywhere just not at scantime, at scantime ur crypter probably is FUD but scantime doesnt matter shit while runtime is

detected.

You still didnt answer why u gave me negative 3 but not to conquer even though we both talk offtopic. Maybe ur just an abusive kid who knows he will get -3 return from an ub3r but normal member cant do shit, right?

Btw bro, I don't like how you lie to your customers that ur crypter is Runtime FUD. Its not cool, you waste your customer time and money just quit from the crypter market since you can't code shit and you only c+p.

Wardow - January 5, 2015, 7:02 am

Look at my latest posts at this forum and maybe you will decide to shut the fuck up and sit down. AutoIT coders are a joke.

Send me a crypted calc.exe and I will confirm that ur talking bullshit.

Quote:And Btw, i am runtime fud, just norton is catching me :p

Not just Norton. Every Anti-virus with HIPS enabled. Dont test free versions, they most likely dont have HIPS lol.

I am 18 years old boy. I was coding ring3 rootkits when i was 15 lol. I don't think you even know that 0xE9 opcode represents a far JMP instruction. Lets forget even about coding a hook engine Imfao.

Yes, it is easy as fuck, I just want to make enough \$ for an upgrade so I can at least neutral abusive members like yourself and PoisonKnife.

Wardow - January 5, 2015, 7:19 am

Why would I waste 18 dollars on an upgrade which I can get for free by providing easy services? This forum is not worth putting any money on it. I havent learned anything since I joined, everyone have so low standards here, I am just here for the laughs that members like yourself give me.

You called me retarded and gave me negative for talking offtopic in this topic yet you do the same and you continue to do so. You're a fucking hypocrite little boy.

Wait for my crypter, it will take yours off the market because no one needs a crypter with 1 MB stub and shitty RunPE shellcode that you call inline ASM even though its not inline ASM Imfao.

Send me fucking calc.exe crypted with ur 1337 crypter so I can prove its detected as fuck at runtime.

Wardow - January 5, 2015, 7:22 am

Why do every hf coder add useless shit to his crypter? What next? Maybe you will add formgrabber and webinjects too to a crypter?

I will test it, but a crypter is supposed to crypt and thats it, not avkill+botkill+rootkit+formgrabber+webinjects+ruskil+persistance+otherrandombullshit. Most people don't even use crypter startup and all other useless non sense, the purpose of crypter is to load payload in itself and let it do all its job as if it wasnt even crypted.

Wardow - January 5, 2015, 8:23 am

Persistance is fucking usefull lol.

iamskid - January 5, 2015, 8:27 am

(Jan 5, 2015 09:23 AM)W????? Wrote: [\[CITE\]](#) Persistance is fucking usefull lol.

If you use worthless complete bullshit piece of shit excuse for malware that dont have a Rootkit and Persistence then yes its useful. In most cases, it just bloats your crypter. Persistence for what? Startup? Who uses crypter startup? By using crypter startup you're corrupting your malware. Oh I forgot, this is hackforums, everyone have extremely low standards and use .NET crapware in which they disable startup and use crypter 1337 features.

Some guy tested your crypted file before I had the chance.

<http://postimg.org/image/bil4ix61j/>

Its KIS detected. Probably AVG, Comodo and every other HIPS as I said. RunPE is detected shit, stop using it.

SilverLight - January 5, 2015, 9:31 am

yes true ? hahaha , i think War finished , you continue ?.

The Old Warrior - January 5, 2015, 5:18 pm

I'll be making videos later tonight against AV.

If you want to request an AV to be tested, post them here.

Will do most Famous AV.

- Kaspersky
- ESET
- Avast
- AVG
- Dr.Web
- Norton

Norton Security 2015 Vs. Broad Crypter

[Video: https://www.youtube.com/watch?v=xflgoQ_Tly8]

The Old Warrior - January 7, 2015, 7:07 pm

Should I continue making Videos against these famous AV?

Or these haters and wannabes are done opening their mouth?

Where are the guys that said RunPE are garbage? That they are no good against HIPS.

I don't know how educated these people are. But it seems like you need to spend quite sometime taking your head out of your ass.

Just because them public runpe are detected. It doesn't mean all are :)

Obviously, they are using public runpe lol.

That's what happened when people can't code nor understand what they are dealing with.

I've got reports from my support guy that they are hating this because it uses RunPE. I don't know if they are blind or not. But obviously, they can't seems to watch them videos I posted.

Just to get satisfy these wannabes, I will add a packer style on this crypter as option. With or without stub.

So I've got a little bit of time today and Updated my crypter against AVG.

Here is my video.

Broad Crypter VS AVG Internet Security 2015

[Video: <http://youtu.be/0dSoWmBXoZA>]

Now you decide :)

Best Regards,
The Old Warrior

N3oNight - January 8, 2015, 6:28 am

@The Old Warrior : Buddy you can ignore those hatters and flamers..

they dont know anything about crypters and only flame because you have a very good crypter..

I have faced many of them when i started my crypter but i just ignored them and they just go away..

If you answer them then they will get chance to flame more on your thread.

best is just ignore them.

FuzzylInteger - January 8, 2015, 6:43 am

100% agree people just not understand, runpe loadpe DO NOT MATTER,

i bypass norton 2015, avast,avg,gdata,kis

just by adding a valid digital signature

and broad crypter bypass them with the same trick...

SilverLight - January 8, 2015, 9:44 am

TOW bro ignore tham lol we all know you are number 1 world cracker and you own most HQ crypter in the market and out of HackForums too and its cant be cracked too lol and you already smashed all AV's haha , man remember this HF.

PoisonKnife - January 8, 2015, 10:16 am

Broad Crypter is the best crypter out there.

Hit me up if you want to do business or if you have any questions.

The Old Warrior - January 8, 2015, 7:50 pm

^^ I'm not really worry about them :)

I just like to proved them wrong.

Another guy @ HH were showing off his 3.5kb stub that doesn't even bypass crap.

I thought, I'd show off my 1kb stub as well.
