Thread: [uBot without bugs/glitches?](#)

District - January 3, 2015, 4:45 pm

Anyone know where I can get a copy of uBot, preferably without all the bugs/glitches like the one released on HF atm? Wanna start herding with it and try it out.

any version of uBot is bad. just use something else

Seth01 - January 3, 2015, 5:02 pm

Yes uBot won't work good for herding. It is fine if you are just starting/learning.

What'd you suggest? Something known to be safe w/o exploits please.

andromeda, smoke are my fav loaders

jibber - January 4, 2015, 10:27 am

Kraken HTTP see a good bot to hold and kill smoke/andro.

Andromeda 2.06 is free and cracked if you cant spend money.

Botnets aren't just all about stress testing. If you wanna ddos go buy a booter from the hf marketplace for like \$3.
