Thread: [Vapor Waffles \(raffles\) allowed?](#)

Zenode - January 3, 2015, 10:10 pm

I am currently going to be hosting raffles otherwise known as waffles on a facebook group page. What this is, is where you basically raffle off vaping mods, etc... And you put it where you have a criteria of say, 20 slots at 2\$ ea. And how the winner will be chosen is a live video will be recorder randomly picking a ball, labeled 1 - 20, and whoever number that is wins the equipment and will be shipped the equipment. Is this type of stuff allowed on hack forums? Thanks

Griev?us - January 3, 2015, 10:14 pm

Raffles are allowed and should be posted in the [Member Contests](#) Section.

I'm unsure if you're asking if a raffle is allowed or if you're allowed to ship items out to members. If you're asking if you're allowed to ship out items, I'm sure it'll be allowed as long as their is proof of payment with the member allowing you to send the item to their house.

From my past experience, I've seen that members are allowed to host a service in which they buy amazon items and ship them out to the buyers, as long as it's verified.
