Ultimate Downloader Pre-Activated

Advanced advantages

- ? Completely new core written in C++, stable and fast, very low CPU usage.
- ? Intelligent Connection, Auto Optimization for different connections.
- ? Smart Rate Control, optimize the upload distribution to get the max download rate.
- ? Disk Allocating, no long-time disk allocation, decrease disk fragment to almost zero.
- ? Intelligent Hash Scan, no time-consuming scanning when seeding / resume.
- ? Firewall and NAT Traversal, users behind different NAT can connect to each other.
- ? Compatible with Windows XP SP2 TCP/IP restriction (new in v1.0).
- ? Ability to block IP temporarily or permanently, compatible with eMule ipfilter.dat.
- ? Using only one TCP listening port.
- ? Auto config ICF and ICS in Windows XP.
- ? Auto config port mapping in router (UPnP support is required, Windows XP is required).
- ? Support Multi-tracker, and utf-8 extension, UDP tracker Protocol v2.
- ? Auto Update Checker.
- ? Multi-Language supported, support 20 language now.
- ? No need to install, but install/uninstall packages are provided.
- ? [Please Note]: Reports say Zone Alarm 5.0 conflict with BitLord (and other p2p maybe).
- ? Intelligent Disk Cache, decrease the potential damage to the hard disk when high-speed downloading (>500KB/s) by decrease the read / write frequency, extra memory usage is the cost.

ABSOLUTELY THE BEST DOWNLOADER

Download link:

(Removed,because of leechers.)

Post here and i will pm you with a direct download link.

You will not receive it if you are LQ.
