Thread: [Mining pool down?](#)

Raoul Duke - January 4, 2015, 9:53 am

Hi everyone I think there is a problem with the 2 main OMC mining pool:

pool.omnicoin.cc
website: down
stratum: down

omnicha.in
website: down
stratum: up

It's only me or there is a problem?

EDIT: Omnicha.in website is back

JavaCoderz - January 4, 2015, 10:59 am

It's not just you, Blue's has been down for me since at least yesterday and Omnichain's been down for me this morning.

Raoul Duke - January 4, 2015, 11:10 am

It's weird that 2 pool got down at the same time ... waiting for more information

Abraham Lincoln - January 4, 2015, 11:18 am

It appears the OVH datacenter is having issues.

Omnichain is functional again, but I need to do a bit of work on the pool to get it running smoothly again.

EDIT: Omnichain pool is running just fine now.

Yes, we're not really sure what caused it, but the fix is as simple as a reboot. Unfortunately my pool will be down until Omniscent can restart the server.

For your record the servers went down around 4th of January at 0:55 AM UTC.

Somehow even tho my pool is at the same DC it didn't go down. Everything is back now.
