Thread: [\\$5 NOW | MAKE \\$100+ A DAY | 100% SUPORT | 100% REFUND | AUTO-BUY](#)

Vamporno - January 5, 2015, 9:54 pm

This eBook contains multiple ways to make money for only \$5. If you ask why are you selling this method if you can make this much in a day, well the answer is simple. It's too easy that any one can make money. Don't even ask for vouch copies because this is literally the cheapest eBook you can buy on HF that actually works.

I have received a vouch copy for this eBook. I am not affiliated with Vamporno and this is an entirely honest review.

The quality of written communication is very high. The layout is clean, legible and there are no spelling and minute grammar errors; everything is easy to understand.

The method itself is very clever. There are several sets of concise step by step instructions on how to do everything.

This definitely isn't instant and will take more than a few minutes but is certainly worth the money.

Talking for money, this eBook is worth much more than \$5, so you are certainly getting a great deal; I recommend buying this.

GLWS OP!

I'll wait for a proper review or you could let me.

You make \$100 per day yet sell this for \$5
That is around 36.5k\$ per year and just \$5

Hmm?

The method is easy to do and is 100% easy. It won't get patch imo and is the easiest and an legit method out there. If you buy the eBook you see why it's cheap since you require to actually do work.

Sumix - January 7, 2015, 3:19 am

I will write a detailed (300-400) word review if I could get a vouch copy of the product.

You make \$3000+ a month and sell this e-book for only \$5?

Either you don't make \$3K+ a month - if you did, you wouldn't sell it so cheap - or if you really make \$3K+ a month, you should raise the price to \$100 or something around that.

Also, provide proof of your earnings.
I want to see your \$100+ earnings per day.

What he said :D

I would need some proof or a very detailed review from someone trusted before I go and purchase this.

As I said in my review, it's not quite as simple as clicking a button and getting \$3000 a month; you've got to put work in. The OP may not want to put the work in so they sell the method. It is valid though. The effort isn't too much either.

OP would rather make 3 x \$5 a week than make \$3,000+ a month.
That doesn't seem right.

And so what if OP needs to work with it?
He would be getting \$3K+ a month for the trouble.

I don't know. All I do know is that it is a legitimate method. If you do enough of it, you will have earned \$3k. That amount would be a bit of work but the claim definitely isn't false. The claim could just as well have been \$2k or \$4k to be honest.

I am not affiliated with the OP but they are not lying. It works. :)

Edit: for \$5 it's hardly a risk too.

Personally I don't believe OP is making \$3K+, or 2 or 4, if he isn't prepared to post some proof.

The price of \$5 is just too cheap for me to believe OP is using this method to make money.

You claim that we can earn \$100 A "day", then how much will I earn if we count that as monthly? \$8K or more?

\$100 per day x 30 days = \$3,000

Or did I miss something?

The eBook is complete bullshit? I don't even think you bought it. Also, this method works 100%.

Why I'm selling it? You actually have to do some work and extra stuff to actually make money. Why not make an eBook and get \$5 per sale for teaching the method that I'm using which 100% will not be patch. Even if you can't make some earning the first day you can get your money back not sure why people acting like \$5 isn't a good price for a easy and simple method that can get you money.

If anyone wants proof of the stuff I bought with the money i got I can gladly show it

You can make even more than \$100 a day if you try hard enough. Even \$800 at a single shot.

Moghul - January 8, 2015, 12:47 am

Are there any requirements and/or investments to get this method to work?

Also, how much max time you need to dedicate daily?

Well probably around \$1 or \$2 max. And for the max time probably 10-20 minutes.

Review

Ok here are my review on the e-book.

I'm not going to make a review with numbers (like 7/10) and I'm not going to review the spelling or the grammar - none of it affects the methods, which are the important stuff.

The e-book consists of 3 methods. The first methods consists of 2 methods - if that's make any sense :)

To make it clear, I have seen all of the methods before, so this e-book is not original.
If you search hard, you'll be able to find the methods for free on HF or on other forums.

This e-book just use other words to describe the methods.

The first method:

To get this method to work, you need a to use quite a lot of Social Engineering (SE) and you need to commit fraud too.

This applies for both methods in method 1.

The second method:

This method is one of the most described in "Make Money" e-books on HF.

You need a investment to make it work and you need to be smart, to not loose money on it - Yes, you can loose money on this method, if you're not using your head.

The investment can be small, like \$10 or so, but you need it to use this method.

The e-book then says it's possible to do the method over and over again, but the e-book forget to mention, that you need to wait for 20-21 (I can't remember which one it is) days before you can do it again - unless you are willing to put in an investment more.

Your profit are NOT going to be massive and if you mess up, you can loose money on it.
BUT you should be able to make a small profit.

The third method:

This method is (IMO) the second most described money making method.

Again you need an investment, which can be around \$5-\$10 to start with.

You will then need some good SE to make money on it.

Again, like with the second method, you won't make a lot of money, but you can make some dollars once in a while.

The better you are at SEing, the more you're going to make.

Is this e-book worth \$5.

I could say yes and I could say no and I'm able to defend both.

Yes, because it's not a lot of money and you can make your money back if you are using your head.

If you are willing to commit fraud and are good with SEing, you COULD make some seriuos cash, but if you are doing it often, the police could come knocking on your door.

No, because you can find these methods all over HF and on the internet and I don't like to pay for free stuff

And because method one sooner or later will result in a visit by the cops or a letter from a lawyer.

It's going to be a no, I don't think this book is worth the \$5 it's being sold for.

AND IMO I think the e-book should have gone in depth with the methods some more.

For me it's looks as 3 of the most known methods on making money are put into this e-book and are sold for \$5 so the author could make some fast money.

I want thank OP for letting me review this e-book and it was a 100% honest review as I promised.
