Thread: [\[Tutorial\] How to make a matrix scrolling effect *Cool*](#)

0xDEAD10CC - June 5, 2010, 4:23 pm

This is pretty much useless, but if your bored, here is the command lines to make a matrix type of effect showing a whole bunch of numbers scrolling down in the command prompt. It's pretty cool, but there is no need or purpose for it.

Here it is:

```
@echo off
color 3
:start
echo %random% %random% %random% %random% %random% %random% %random%
%random% %random% %random% %random% %random% %random% %random%
goto start
```

Make this into a .bat file from notepad. (Save as > with file extension ".bat" if you don't know how)

NOTE: you can change the "color 2" on the second line to another number from 1-9. 2 just indicates that the text is "cyan" I guess is the color.

If you add a 2 digit number though, the background will be a different color depending on what number you choose. I just chose 3 because its the most authentic color to the movie.

We have 21 threads on the matrix batch. We don't need another.

It looks fuck all like the matrix anyway.

Nothing special... But good job anyway.

I recommend making more.." Constructive" programs

0xDEAD10CC - June 5, 2010, 6:29 pm

It wasn't designed to be a program lol. But I agree, this was just one of those things to make the art of hacking seem fun, and look nice :)

A dark cyan is matrix? Since when?

Try A.

Tried your code, it keeps repeating the rap one when you choose it...
