Thread: [if you pretend to be a really young girl in a chatroom...](#)

clark.dll - January 7, 2015, 12:09 am

you will be instantly mulled by perverts twice your age. My friend and I were fucking around on chat avenue and we pretended to be 12 and in less than 30 seconds I had like 5 guys personal message me. They were all after sex but they each had their own approach. Some message you pretending to care about what you're up to and shit, then some get right to the point.

"hey sweetie wanna see daddys hot cock? do u have skype hun?? can u turn ur cam on??"

that was literally the first message I got. I do not want to have a daughter.. ever.

Coobro - January 7, 2015, 12:12 am

Hahaha, There are some youtubers who like expose those people and it is hilarious ?

shreder - January 7, 2015, 12:14 am

I remember when i was twelve i h it on girls in chatroom like 18-20 year olds but other way around is strange i was a retard back then haha this was on aim idk :)

Edit: I have a really, really good idea.

I'm not saying what it is. Keep the thread alive and I'll show you soon.

Got three chats, had more but they disconnected when I sent the Chris Hansen pic lmao. Posting soon.

This kid's 14, the chat was cut off but he told me he wants to come to my house and fuck me. That was after I told him that my cat just died and my parents broke up, and that I was about to break up with my boyfriend.
True love, gentlemen.

"i figured u was lien to him"

That's from his '21' year old brother that had to 'go to work'.

This guy is 41 years old. He's probably older though. What a creeeeep.

This guy was 47.

I then asked him if he wanted chat sex and he left the chat.

Edit: Picture of Chris Hansen.

Everyone, my idea which I mentioned below is a pretty good one.

I'm too lazy to do it. Here's the idea.

Use an IP grabber:

<http://www.#/ip-grabber/index.html>

<http://#.tk/>

<http://ip-grabber.com/>

Get their IP, then say 'sorry, wrong link hehe!'. That's when you continue the conversation until they ask for sex.

Then, geolocate their IP to coordinates. Use Google Streetview to get a picture of their house with the coordinates.

All that's left to do is send them a picture of their house and say, "I'm from the FBI. We are nearing your location".

Watch em freak.

Edit: I'll do it myself once right now, then I'll let you guys go for it.

If you upload pictures of IP grabbers please censor the link, it is against the rules.

I have been on many different chat sites over the last year and a half. As soon as your logged in as a female and enter the room you are instantly bombarded with guys looking for some action, sending dick pics right from the start, just all around craziness. This goes for chat rooms, skype, kik, any sort of messengers. If you are saying your like 12-14 and your getting sent those types of things is insane! I know it happens but those types of creeps preying on young girls need to be reported
