which are the risks of doing this?...

xandyahx - January 7, 2015, 1:56 pm

There's not really risk in this business unless you scam the customer.

Depending on the area you are in, and the extremity of the methods you use, you could get in serious trouble.

I wouldn't advise doing those methods, however, and they're not allowed to be discussed here.

If you need some help getting started, and tools, you can find everything you need to know here:
