Thread: [FREE \[TUT\] How to spread your stub \[TUT\] FREE](#)

OwnRedBull - January 8, 2015, 8:58 am

Hey HF

So I have tried many spreading methods which i have found all over HF but i will share my favourite way that i got most of my victims from. This is a well known method however I am going to tell you how I did it successfully.

The method is... Youtube.

This is good as your stub will spread automaticly after you upload a video (autopilot).

So firstly i created a youtube channel with a tutorial like name(not going to share mine as some people may come on and tell people its a virus.

Then i looked on the market place and for 10 dollars i got 1k subs and 5k views on my vid which i will talk about later.... 300 likes and 50 comments. Comments where like "Wow thanks dude.. this works" ect.... pretty cheap hey???

Then i found a video i wanted to copy for example.. How to get sony Vegas free ect... the one I found didn't say his name in the intro and said "This is my first video on my channel so I hope you enjoy" which was perfect for me as it was my first vid aswell. When i got the video I looked at the link... eg [http://www.youtube.com/\(whatever\)](http://www.youtube.com/(whatever)) then i changed it to this: [http://www.ssyoutube.com/\(whatever\)](http://www.ssyoutube.com/(whatever)) -- putting the ss takes me to a page where i can download that video... then i copied the destription and the download link .. (Make sure the crack actually works to keep getting likes and comments) -- then i binded my stub to it.... put it on ge.tt and changed the download link....

I then put it on youtube and got those likes comments and views i paid for.. then i started getting slaves within hours .. it was slow to start off but i kept getting more and more.

Just keep crypting in so no-one comments saying its a virus ... and your good to go! ?

Let me know if this helped you :)

You could easily take it a step further and make your fake software (though that is a no-no here on HF -.-) and your own videos. This would probably help making it look more legit.

A fairly well known method but it was explained well so nice job & keep it up.

Mr_Anonymous - January 8, 2015, 9:12 am

nice TUT, im sure this will be helpful for some
