But then I thought about it and this group is about Hacking and Stress Testing, so I figured I'd have to incorporate some meaning besides just the name, and I tried to relate it to the group itself. So I figured how could I relate a cave to stress testing? And that made me think that I should add bats into it, with the bats representing the "hackers" that are hidden, always up at night, and being very mysterious.

Not sure if this looks good or anything, but even if you don't like the look of it, I believe a cave with bats incorporated into it is a good idea.

Spoiler [\(Click to View\)](#)

The name is "Echo" which immediately made me think, what echos? And I thought of caves, which I thought a cave would be cool. But then I thought about it and this group is about Hacking and Stress Testing, so I figured I'd have to incorporate some meaning besides just the name, and I tried to relate it to the group itself. So I figured how could I relate a cave to stress testing? And that made me think that I should add bats into it, with the bats representing the "hackers" that are hidden, always up at night, and being very mysterious.

Not sure if this looks good or anything, but even if you don't like the look of it, I believe a cave with bats incorporated into it is a good idea.

I would've liked it if it wasn't ripped straight off someone's work.

They want something unique something that meets their idea which is a hacking/stress testing related.

Now, think of stressers what do they do? they take down sites they take down connections period. Then there is Hacking well i'm quite sure every knows how far you can go creative-wise with the subject hacking.

Now turn on the creative tank and start thinking what would meet these two subjects, it's a hazzard it's dangerous and they are a force to be reckoned with, an elite group.

Don't think of the word 'Echo' when you design something, think of what the group represents and then go outside the box with what You think would look great.

Some things would be that it cuts of the image on the left, right, bottom and top, and the black stroke looks weird. Kind of like it's ripped - not saying it is, but it just looks odd in a way.

I'll be picking a UB later tonight than changing it in a month or two.

**Shanks** - January 10, 2015, 3:56 pm

I actually feel as my entry was the best, but notherless good luck finding one that you like.

I sort of feel as they are all quite alike, like it's same person doing them all over again.

Do we have a massive multi-accounter case on our hands here Detective Shanks?

Poll has been updated with the top 3.

Vote guys! We can decide so we'll pick the one that wins.

Reminds me of a pussy, that doesn't mean it's a bad entery though ?

Edit: Voted for #1 because I like the concept and because it's different.

Thoughts on this being the UB?

**Nostril** - January 10, 2015, 4:30 pm

#2 is sexy as fuck, but as the dude above me said, the corners need to be worked on.

**Paranoid?** - January 10, 2015, 4:31 pm

I believe there could be better entries, but my vote goes to the first UB.

**SIMAAS** - January 10, 2015, 4:32 pm

Damn, didn't make it to the deadline, Number 3 is the best imo.

**Bonfire** - January 10, 2015, 4:34 pm

I'm going with #2. I like #3, but it has no relevance.

Lets face it, everyone and their mothers can drop some text on a userbar and make a terminal (#1). Also, the tiny text in #1 makes me want to throw up. If I can't read it, why is it there

Work on those corners for #2, and I think we'll have a winner.

(Jan 10, 2015 05:29 PM)Understalker Wrote: [\[CITE\]](#) Thoughts on this being the UB?

I like the default userbar for #2. If we do go with that design, they'll need to be more transparent and blend in. They stick out like sore thumbs.

Ripple's UB is p sick imo

**Simply™** - January 10, 2015, 4:44 pm

#1 is fucking sick. The other two are too mainstream.

**Mate.** - January 10, 2015, 4:48 pm

Here's my quick attempt at it. If the deadline is extended, I can spend a little more time different designs I have in mind. ?

Banned repost them in size for a UB, and as seperate images to see what they look like on a profile.

Also, whats with the random colors in the Es?

I'm still not a fan of using only E.

I think either Echo/ECHO or nothing.

**Karnaugh** - January 10, 2015, 4:53 pm

I think the last one is the coolest.

**Mittens** - January 10, 2015, 4:55 pm

How can you portray a DDoS? It's not something you can show tbh, well you can but IMO you can't for a UB.

Yeah, what in the fuck are you talking about? I sold my account because I said those god damn userbars are ugly? And I put a smiley to keep things light since a majority of you morons would have responded asking why I'm being an asshole and why I don't do something better.

That's because you are a terrible designer. Illustrator keeps the quality, and if you do it well, it looks good.

A black userbar would be good.
