Why not... put it up on Git or Mercurial? You know... as one should be doing with source code?

OP has commitment issues.

OP is also a masochist.

If using that on HF, keep in mind it's not allowed.

I was saying, if you were retrieving profiles from HF, to fill that "simulator"...

nevermind if not.

There is a rule against the automation of Hack Forums, this includes but is not limited to programs to replicate the functionality of Hack Forums. Any users who do this will most likely be banned.

what does masochism have to do with this?

Long story short, OP does not learn that leeching releases from other users, then claiming them as his own will get him in shit here, especially when he is found out...

The end result of repeated incidents such as that, was [this thread](#), and his signature being changed to something like "I'm done with hackforums (#your know the reason)" (Don't quote me on that.)

OP has returned, despite quitting because he was hated upon for leeching content. The way i see it, is he enjoys being hated upon for leeching content.

Little pointless, but it does look rather like HF.

sha110w - January 9, 2015, 9:39 pm

What the fuck is the point of this stupid thing?

hellomen - January 10, 2015, 1:30 am

And all I see people doing is hitting on this kid.

Seriously guys, you have nothing better to do then keeping a thread alive like this one?

Isn't there enough hate in the world?

Even through you have a strong opinion about this, no need to swear around in it all the time...

@op I don't see the use of this program, try to think into useful things unless it's for self education, then you need to go over the line of what you know to what you don't
