French Products - January 8, 2015, 7:19 pm

SCREENSHOTS :

There's a possibility (not official) that SpyralScanner distributes samples to AVS. He doesn't want to fix his scanner, the scans on SpyralScanner are ABSOLUTELY FORBIDDEN. Those scans will be considered as any Virustotal, Jotti, ect scan, the same sentences will be applied.

SCANTIME SCAN RESULT :

Wardow - January 8, 2015, 7:33 pm

Vouch for FrenchCrypter and Static crypt, i helped him for create his crypter, and don't worry it's an High Quality Crypter, dont hesitate to buy!

xRaiders - January 8, 2015, 7:37 pm

Nice to see a new crypter in the market, good luck with your sales!

French Products - January 8, 2015, 7:43 pm

(Jan 8, 2015 08:37 PM)NKMZ Wrote: [\[CITE\]](#) Nice to see a new crypter in the market, good luck with your sales!

Thanks you bro ? !

-FrenchCrypter

ProOgar - January 9, 2015, 3:22 am

can I have a vouch copy please?

good luck with sales

French Products - January 9, 2015, 4:31 am

For get vouch copy send me a pm :)

(I send 5 copy for vouch)

Wardow - January 9, 2015, 6:10 pm

(Jan 9, 2015 04:24 AM)Miki Wrote: [\[CITE\]](#) Probably another prestigio crypter getting added to the market~~.?

Go away from this Thread, Prestigio is banned, and i helped FrenchCrypter to code his Crypter, he don't need flaming on his thread, let him sell his crypter, this is totally ridiculous from you.

French Products - January 9, 2015, 11:53 pm

there is only one copy vouch, made quickly :)

Ibrahimovic^ - January 10, 2015, 1:52 am

This got self inject and work with steam stealer?

Kill?Muvz - January 10, 2015, 2:39 am

Yet another crypter with no innovative functions.

Best of luck.

©Ratatouille™ - January 10, 2015, 10:39 am

Hello man

Is possiblle to receive one vouch copy ?

Thanks and good luck

French Products - January 10, 2015, 2:49 pm

I have receive the crypt, thanks very much !

Sub Ohm - January 11, 2015, 1:23 pm

I bought the crypter. Its still new so theres not a ton of features. However, what it does have in its defense It works. It does what it needs to do and its FUD at the time of this post. French is pretty cool and helpful. New features are being worked on. I vouch for the product

Memorial - January 12, 2015, 11:25 am

I don't think you know what you're talking about:
Injection options - .Net 2, .Net 4, svchost, dllhost, no.....

What are you on about? Using those 5 options in radio buttons are just complete nonsense.

Wardow - January 15, 2015, 6:26 am

(Jan 15, 2015 07:19 AM)Kill?Muvz Wrote: [\[CITE\]](#) I don't think you know what you're talking about: Injection options - .Net 2, .Net 4, svchost, dllhost, no.....

He totally know about what he is talking about, it's injecting into a different program you can't use two times the same option :p

Kill?Muvz - January 15, 2015, 9:48 am

(Jan 15, 2015 07:26 AM)W????? Wrote: [\[CITE\]](#) He totally know about what he is talking about, it's injecting into a different program you can't use two times the same option :p

I know radio buttons work, but you can inject into svchost regardless of what framework you target. He is mixing frameworks with executables, totally different things Wardow.

Wardow - January 15, 2015, 10:20 am

In autoit for support .NET we are injecting in a .NET Executable A.k.a RegSvcs.exe or anything in the Framework 2 Folder :D

Kill?Muvz - January 15, 2015, 10:26 am

(Jan 15, 2015 11:20 AM)W????? Wrote: [\[CITE\]](#) In autoit for support .NET we are injecting in a .NET Executable A.k.a RegSvcs.exe or anything in the Framework 2 Folder :D

Oh nevermind I thought the stub was .net and not AutoIT.

You shouldn't put in the thread that it was coded in vb.net and AutoIT.

All people care about is what the stub was coded in!

Wardow - January 15, 2015, 2:44 pm

I'll tell FrenchCrypter about it, For getting it all CLEAR, the Builder is coded in VB.NET, and the stub is coded in Autoit.

French Products - January 15, 2015, 6:37 pm

eCoLoGy - February 9, 2015, 11:46 am

I've just bought this crypter because I needed a native crypter and today I've bought 4 of them and only this and Razor worked.

Great product you have here.
Hope you keep this updated. ?

woahxx - February 10, 2015, 12:43 am

Actually I've seen this leaked (source) on a Spanish forum.

French Products - February 10, 2015, 6:20 am

(Feb 10, 2015 01:43 AM)Conceptinion Wrote: [\[CITE\]](#) Actually I've seen this leaked (source) on a Spanish forum.

I think you have only seen the theme source but my crypter it's not a public source lol

FrenchCoder - June 24, 2015, 4:13 pm

Really nice Crypter , I have Lifetime Packages.

GanDino - June 24, 2015, 4:16 pm

Hello,

what is the precise difference between the light version and the full version? Does your crypter support file binding?

Thanks for you answer.

French Products - June 24, 2015, 6:00 pm

(Jun 24, 2015 04:16 PM)GanDino Wrote: [\[CITE\]](#) Hello,

what is the precise difference between the light version and the full version? Does your crypter support file binding?

Thanks for you answer.

Many change, in lite version there are only 3 crypting settings, there are only one stub, and more

Sida - June 27, 2015, 1:19 am

Vouch for French Crypter.

Sit Back And 420 - June 27, 2015, 5:55 am

Okay, so I have been using this crypter for a few days now just have to say very unique, easy to use, and completely FUD. This crypter is completely worth every cent you put into buying it, if you want a completely FUD easy to use crypter with many feature such as startup, persistence, mutex anti-vm, anti-sandbox, anti-virus total, with those being only a few of the features to name then this is the product for you.

Very happy with this crypter

AnonWorld - July 1, 2015, 8:54 am

Vouch for my friends. 100% Quality Product.

anonbux0 - July 2, 2015, 4:56 am

Bought this crypter yesterday, and still can't open it gives me an error.

I will update when its fixed.

Hey. Might buy soon, but I have a question. The binder in your Crypter... Is it possible to for example, bind a darkcomet stub to an excel document and have the file look like an .xls file with the extension as well?

In other words - I send ... myself ... an .xls file which after opening will open two files - a darkcomet stub & the original xls file?

French Products - September 27, 2015, 4:30 pm

(Sep 27, 2015 04:17 PM)Eriksson Wrote: [\[CITE\]](#) Hey. Might buy soon, but I have a question. The binder in your Crypter... Is it possible to for example, bind a darkcomet stub to an excel document and have the file look like an .xls file with the extension as well?

In other words - I send ... myself ... an .xls file which after opening will open two files - a darkcomet stub & the original xls file? You can bind a excel file or other with the crypted file ,but you can not replace in xls you can only spoof the exetension. You can also replace .exe in .com

Eriksson - September 27, 2015, 4:46 pm

cptmckiten - September 29, 2015, 7:42 pm

what are good settings for luminositylink? I cant get it to work with this crypter

French Products - September 29, 2015, 8:02 pm

(Sep 29, 2015 07:42 PM)cptmckiten Wrote: [\[CITE\]](#) what are good settings for luminositylink? I cant get it to work with this crypter

You do disable the startup, rootkit and sleep management. In the crypter check auto settings.

cptmckiten - September 29, 2015, 8:24 pm

(Sep 29, 2015 08:02 PM)French Crypter Wrote: [\[CITE\]](#) You do disable the startup, rootkit and sleep management. In the crypter check auto settings.

so I disable the startup, rootkit, and sleep management in lumi and just click autosettings in the crypter?

shoto4meeee - September 30, 2015, 1:02 am

does this work with knight logger?

French Products - September 30, 2015, 4:59 am

(Sep 29, 2015 08:24 PM)cptmckiten Wrote: [\[CITE\]](#) so I disable the startup, rootkit, and sleep management in lumi and just click autosettings in the crypter?Yes .

I don't know but I think, send me a pm with a build please I will test.

cptmckiten - September 30, 2015, 2:22 pm

(Sep 30, 2015 04:59 AM)French Crypter Wrote: [\[CITE\]](#) Yes .

I don't know but I think, send me a pm with a build please I will test.

I tried that but it's still not working. Is there anyway I can get support with this?

French Products - September 30, 2015, 2:27 pm

Of course man I can now .

Eriksson - September 30, 2015, 4:37 pm

Can you provide a runtime scan of DC with Startup + Bind? Is it FUD? I've finally gotten some money and I'm on a hunt for a good crypter. So far all the threads I've checked don't really provide no runtime scans to prove their FUD claims and runtime is the thing that matters most. So unless people start providing runtime scans it's just all "guesswork" and risking hard earned money.

French Products - October 1, 2015, 9:07 am

(Sep 30, 2015 04:37 PM)Eriksson Wrote: [\[CITE\]](#) Can you provide a runtime scan of DC with Startup + Bind? Is it FUD? I've finally gotten some money and I'm on a hunt for a good crypter. Ohyea that is to show i m in the right place please below is my Questions

And it Works in all windows version 8 .8.1-10 cos the former crypter i use before it can bypass win 10 but the fud is clean by the window defender will pop-up and ate it up

And one more thing again dude is there any way you can using TeamViewer help once to encrypt just one file as an example

French Products - *October 1, 2015, 3:56 pm*

I bypass windows defender but no smart screen, this use a white list.

And of course I can help you.

banned212 - *October 1, 2015, 4:19 pm*

AutoIT is big stub compilation ~600ko.
You can make less size with a little icon.

French Products - *October 27, 2015, 6:51 pm*

Crypter updated the problem with the delay and icon changer is fixed :

Yes contact owner via pm or [Click Here](#). ?

BLOODLUST - October 31, 2015, 6:30 pm

Hi. I try to contact you in Skype, but havent got reply in 4 days.

I buy your cryptor 5 days ago. I use stealer. Steam Stealer.

I try to crypt it, but it always havent got FUD and it always destroy my file.

Help me please with this issue.

What settings i should use and how to got FUD with it?

Thx.

P.S. TS pm'ed me, that he give me answer today in skype.

BLOODLUST - November 2, 2015, 9:46 pm

So French Crypter pm'ed me 2 days ago that he give me answer in skype.

I wait 2 days but didn't see reply.

Godlypkz - November 3, 2015, 8:17 am

Sent you a pm. Looks good.

xRaiders - November 3, 2015, 6:07 pm

Thank for the refud bro

[\[IMG\]http://www.refud.me/results/qxjntzqqp5er0cqfm1sywh1cvwcbqshasea.png\[/IMG\]](http://www.refud.me/results/qxjntzqqp5er0cqfm1sywh1cvwcbqshasea.png)

BLOODLUST - November 4, 2015, 5:27 am

Dude, give me answer in skype, i can't pm you.

You say that you do this 3 days ago.

All my files always didnt work after crypt.

The Darknessy - November 4, 2015, 3:48 pm

Nice crypter thanks buddy!

French Products - November 6, 2015, 2:20 am

Currently problems with hosting please be patient the problem will be fixed the more fast possible.

For the problems with netseal and the problems with the hosting, I will add 2 days at all licenses.

Ted Baker - November 6, 2015, 9:34 am

<http://refud.me/results.php?id=bq6fj39abhp27it538ecjv365awrusbobgg> 2 detections and were not even talking about runtime.

French Products - November 24, 2015, 12:35 pm

Crypter updated problem fixed, now you do use the icon changer in the pack.

kurorolucifer23 - November 26, 2015, 11:58 pm

sup? whats the current detections please,, looking forward to buy this crypter look promising.

james007 - November 27, 2015, 2:17 am

It's no more FUD... High detection rate.. Kindly update stubs please

~ L ~ - November 27, 2015, 10:13 am

Hi, I bought your crypter yesterday and it didn't generate me a code and didn't give me any download links

French Products - November 28, 2015, 5:03 am

(Nov 27, 2015 12:58 AM)kurorolucifer23 Wrote: [\[CITE\]](#) sup? whats the current detections please,, looking forward to buy this crypter look promising.

Currently, we have forticlient I fix it in this day.

(Nov 27, 2015 03:17 AM)james007 Wrote: [\[CITE\]](#) It's no more FUD... High detection rate.. Kindly update stubs please

High detection rate ? Please use HQ icon search on this <http://www.iconarchive.com/>

(Nov 27, 2015 03:17 AM)james007 Wrote: [\[CITE\]](#) It's no more FUD... High detection rate.. Kindly update stubs please

I do just accept the payment on my paypal I make this now.

kurorolucifer23 - November 28, 2015, 5:44 am

ill but this once you update it again to fud thanks

Fresku - November 30, 2015, 12:43 pm

Bought it today and using njRat I ran into some problems, but well okay I sent him a PM with the error it gave me and he said he was working on it and should be fixed today.

Quick support is something I really appreciate, the crypter looks promising to me. The crypted file I made was not totally FUD, it was 1/51 or something. By Norton it was detected I believe. But it may be the .ico I was using. But yet, 1/51 is acceptable to me.

Overall I'd say a vouch to the coder because of the quick support and still being quite FUD.

French Products - November 30, 2015, 4:23 pm

I work currently on the crypter for "array error" this will be fixed this night for sure, with possible forticlient detection.

I work on this detection, but hard to fix I will fixe this for the more fast delay.

3 days free will be add in all license thanks.

French Products - December 1, 2015, 8:03 pm

Crypter is updated :

- Scanner is back (result is currently in a message box but will be finish tomorrow)
- integrated icon changer back
- new fud method

Hey there is some kind of trouble i ques (cause i thought that 2) but u receive an mail by payco with ur id etc

From there u can download and install it

(Its just in the first mail from payco)

Maybe a small tip for french crypter put some more details on the description (@payco)

Will test the crypter later today and post the outcome

Looks good anyhow :)

French Products - December 14, 2015, 5:31 pm

Crypter is updated :

- 2 new .NET injections.
- Scanner is fixed.
- Icon Changer is now in the crypter.

I have used many crypters in HF but Static Crypter is simply the best. Since i got to know this crypter it gives me confidence for my file steady FUD.

It's FUD and crypted files stays FUD for long, that's the best part of it!

Do not hesitate to purchase if you want to have value for your money.

Vouch for static crypter.

Dark.Shadow - May 4, 2016, 11:18 pm

Vouch for this crypter. It has good options and more FUD time as compared to others i have used.
Keep it up

ekwueme - May 5, 2016, 7:33 am

Does it work with keyloggers?

Transporter007 - May 5, 2016, 12:47 pm

(May 5, 2016 07:33 AM)ekwueme Wrote: [\[CITE\]](#) Does it work with keyloggers?

Yes it can crypt keyloggers native and .net aswell. ?

pro12 - May 5, 2016, 10:15 pm

I bought a good encryption, but there was not a problem due to the victim

French Products - May 5, 2016, 10:26 pm

(May 5, 2016 10:15 PM)pro12 Wrote: [\[CITE\]](#) I bought a good encryption, but there was not a problem due to the victim Thanks for your feedback ?

If someone have AVG detection just make your install in Temp, AVG currently detect @AppDataDir in my script, don't worry I will find an something for that.

With an install Temp you can have a fud result in waiting an update :

ekwueme - May 6, 2016, 10:59 am

OK,I will purchase soon,if u bind 2 exe files cani it still be fud,and what's the best injection for .net files?

French Products - May 6, 2016, 1:17 pm

(May 6, 2016 10:59 AM)ekwueme Wrote: [\[CITE\]](#) OK,I will purchase soon,if u bind 2 exe files cani it still be fud,and what's the best injection for .net files?For detects of file bind I encrypt data of the file in base64 for be sure there are nothing. But the better fud time method is using a downloader. For .NET injection you have the choice for me I like more use RegAsm.

ekwueme - May 6, 2016, 1:43 pm

Thanks man,I will purchase this tomorrow.

French Products - May 7, 2016, 4:07 pm

Goldmouth - June 21, 2016, 11:02 am

Will this crypter work with Native Zyklon?

newway - June 21, 2016, 11:46 am

So we have to change assembly and icon every time to get it did ? Or simply it get fud?

Mitlar - June 21, 2016, 2:10 pm

(Jun 21, 2016 11:02 AM)Hostah Wrote: [\[CITE\]](#) Will this crypter work with Native Zyklon?It should work with any Native files.

(Jun 21, 2016 11:46 AM)newway Wrote: [\[CITE\]](#) So we have to change assembly and icon every time to get it did ? Or simply it get fud?For the assembly their is a random option in the crypter and Static comes with Icons and I can personally give you some.

Hope I answered all your questions.
?

cgi-bin Laden - June 22, 2016, 12:19 am

(Jun 21, 2016 11:02 PM)gta4000 Wrote: [\[CITE\]](#) Just bought the crypter, I don't recommend.

The scanner doesn't work and I trusted it to be FUD, I scanned it on my avira and it was UD but when I sent it to a person with AVG it was caught.

The persistence feature in it fucks with the affected computer in many ways. I found that uninstalling the server fixes this (it will reappear in a sec).

Also if you are using darkcomet forget about using any of the practical functionalities since only the keylogger will work fine (screen capture/file transfer..etc) won't work well.

Also, advertisements inside a program I paid money for is definatly unacceptable IMHO. However this might not bother others.

The layout is 5 stars though.

Also it is detected by chrome and windows defender... pretty hard to get bots this way (Luminosity)

gta4000 - June 22, 2016, 3:28 am

(Jun 22, 2016 01:50 AM)UKninja Wrote: [\[CITE\]](#) Chrome is due to the direct download site you are using to distribute your stub NOT the Crypter.. It's not detected by Windows defender but it is picking up AVG detections at the moment. French_crypter is working on that.

The scanner is not working due to the scanner API not french_crypters fault. I suggest you use majyx and poison scanner no distribute sites.

There is nothing wrong with the persistence feature and as far as dark comment goes then no

those features won't work as DC is outdated and does not work anymore.... I suggest you update your RAT bro. If you are looking for a Delphi RAT then check my thread for Darktrack 4 which is coming soon. I have tested and it works with Static.

Also I suggest speaking with Fench_crypter before posting on a sales thread. It can be considered sales trashing. He gives very good support and will help you explain all features and issues.

Dark comet still works fine up to windows 7, it's outdated but I only use RATs very occasionally so it doesn't matter. I fixed the bit about the functionality in the OP since I found out that the firewall wasn't deactivated by my binded program as it was supposed to which caused the problem, but the persistence does mess the computer up according to my experience (disabling it makes every thing work normally, enabling it makes running application tab out randomly and go out of focus if no other programs are running)

About your last point, I bought this crypter along with a VPN especially to infect this one machine and only this one machine. I don't collect bots or anything so I just paid 20\$ (excluding the VPN) for a one time thing and it was detected, got me into an awkward situation because of the detection so you can see why I'm pissed off. Also if good reviews are accepted I supposed that bad reviews should be accepted as well. However I do not deny it's partly my fault for blindly trusting the "it's FUD hurrduurr" and not checking myself before sending the file.

However I do not deny it's partly my fault for blindly trusting the "it's FUD hurrduurr" and not checking myself before sending the file. First I want tell you sales trash aren't allowed. After idk why you still use Darkcomet ! Darkcomet is an old RAT and is very detect in memory you can't have a real FUD runtime with darkcomet + FUD crypter at runtime...

People make thread with crypters review it's not for ignore it, this was posted on my thread more than once. When you purchase a product you need read all pages of it.

If you don't like my product I am sorry for you, I can't make better. But smart people like my product.

HQ crypter with HQ author and HQ support.

Mitlar - July 16, 2016, 7:43 pm

People Who Are Crypting .Net Look At This Spoiler ([Click to View](#))If your crying Luminosty or any .Net file follow these settings for self inject:

SIM-3068286 - July 17, 2016, 7:01 am

HQ Support, HQ dev, the crypter has some really nice options. I like the UI ! ?

It's delivered with a nice ICO folder and an icon changer ! ?

Big vouch ! ?

But, today, i can't get lower than 10/35 on the scanner. So maybe not fud anymore (for the moment ?)

Mitlar - July 17, 2016, 7:32 am

Actually the 0/35 is not the first thing i want to have on this crypter. Eset isn't that used where i live. The only thing that is a bit problematic for me is the Self Injection. I can't ask for admin rights without it ?

But you're, all the team, doing a very nice work. I'll use Static a bit more, and then i'll make a review ? ?

Thanks all ?

French Products - August 19, 2016, 11:16 pm

IMPORTANT MESSAGE TO FUTURE CUSTOMERS :

Static is a lot popular I am really happy of it, it's just a proof of my serious work.

But get tons of customers isn't good for our product quality, the next month we'll start new purchasing rules :

Them licenses sell will limited with a maximum of 30 licenses per month, prices will up, I think the future price will 30\$ I am not sure of it for the moment. I think too I'll keep 45 days package but remove others.

I hope you can understand it. We just want a better work for our customers using Static Crypt, new features will added, and I started to work on the new static version. The new version is for soon and you'll can leave your opinion before the release.

Regards, ?

DeluxeSoftware - August 20, 2016, 12:11 am

Nice to see you working on a new version.

He's limiting sales to keep Static as HQ as it is and used to be. Great thing!

+++ VOUCH +++

This issue has been resolved I hope you enjoy the crypter mate!!!

Fud With DarkComet

Make sure to CRYPT a couple times in order to get Fud Results.

Need more help?

Add me on skype: StaticCryptSupport

black666man - August 28, 2016, 12:42 am

hello how do i purchase this crypter

Kisame? - August 28, 2016, 6:50 am

Bought it, hasn't been FUD for 3 days, used different settings, get like 3 detections from ESET and some others... And no, they are not gen-detections. However today there were also some new detections I think the provided assembly data is detected (and randomized assembly data also gave me a detection...).

Hope you can refud it, this thing has no use for me if it is not fud, specially if it has a detection in ESET. I added your skype but you havent accepted me (I am "Kisuke_urahara.bl").

Thanks in advance.

Mitlar - August 28, 2016, 8:08 am

kashif - August 29, 2016, 3:10 pm

looking to buy this crypter but i have one question...how to scan runtime?

Mitlar - August 29, 2016, 3:19 pm

(Aug 29, 2016 03:10 PM)kashif Wrote: [\[CITE\]](#) looking to buy this crypter but i have one question...how to scan runtime?

You can't scan runtime all the websites that did that were taken down. If you want to know what it bypasses look at

<https://hackforums.net/showthread.php?tid=5199646&highlight=Crypter+review+runtime>

MRCASHMONEY101 - August 29, 2016, 9:50 pm

Looks very beautiful,i will come and check that out soon bro

Mitlar - August 31, 2016, 3:06 pm

(Aug 31, 2016 02:59 PM)KisukeUrahara Wrote: [\[CITE\]](#) Nevermind my past reactions. Support is a douchebag, and the crypter is never FUD. Go for Cyberseal instead.

Promising a 100% FUD runtime and scantime, bought it a week ago and not a single FUD crypt, even after updates. Other crypters? No problem to get the stub FUD.

Ask for a refund, they'll tell you "you broke the tos by scanning on nodistribute.com", lmao. Half HF scans there, they probably scanned there untill yesterday when they found out that nodistribute maybe distributes.

This is not sales thrashing. This is my opinion. Shitty service deserves a shitty comment.

You make me laugh

French Products - August 31, 2016, 4:09 pm

First,

Idk why you put the same post x4.

Second,

Did you put an HQ icon ? Did you put default assembly ?

Idk how you can get gen detects....

ESET is only with resources. I'll try to make something for steal and add res from file. But the

problem :

- I can put one exe in project resource but get a final crypter size of 10mb isn't beautiful.
- I can fix the first problem with a download of it, but download 10mb, if a customer have a shit network he can't wait 1hour for crypt.

And another thing I saw nothing of you in my PM box. I think before write shit because you don't know use my product, you can contact the owner ? If you don't like the support, why don't contact the coder ????

PS : LL scan with some resources...

<https://scan.majyx.net/scans/result/64a4ca6a60729e2564de67080630b544c59bf5ed>

New rules was added. Starting today crypter's price is now 30\$ for 45 days. Licenses sold will limited at a maximum of 30 sales per month. That's will helpful for get a better FUD time. If at future you want purchase and the stock is out please wait the 1st of the next month. We apologise for the price up, but this will do not encourage to keep 10000000000000 of customer on one crypter this is not great for your using and for our product's quality.

Regards

Kisame? - September 1, 2016, 3:07 am

I did contact your official support multiple times but he blocked me. I don't think that it would matter a thing who I contacted, the support was the only logical person to contact. Maybe I went too far but I was slightly annoyed when I had to buy another crypter to get my files FUD because it hasnt been possible with Static Crypter since the moment I bought it. Can you deny that? Let's continue in PM.

French Products - September 2, 2016, 9:44 pm

ESET is fixed.

70% of crypts are FUD with the USG:

Scan result :

Mitlar - September 3, 2016, 8:42 am

Your settings are good.

You can also use itself injection with nanocore if in the tab nammed "extra settings" you check the checkbox nammed ".NET To Native Code". So this will be injected in the current process.

Hello,

Here the message that appears at the opening of the encrypt,

Can you tell me more ? thank you

It appears that this program is using and older version of the Net Seal Loader

This legacy mode will no longer be supported after February 1st, 2017.

Please contact the program owner about this message

French Products - December 11, 2016, 5:48 am

how can i pay through skriff?

byme21 - December 12, 2016, 1:50 pm

French Crypter

Look at your e-mail please, problem with my license

IKSector - December 15, 2016, 3:44 pm

Hello guys, please who has tested this crypter extensively? FUD to scan time is good. But what about FUD to runtime?

The 2 crypters I got recently does a great job in remaining FUD to scantime, but have not been able to escape runtime, expecially norton security runtime. Immediately my exploit triggers the crypted stub to download, norton runtime immediately detects it once it executes. And of course, removes it. Is this crypter FUD to runtime? I really need to know so I can make a decision...

Mitlar - December 15, 2016, 4:22 pm

Buy this crypter! It is very good on runtime!

To bypass nortons firewall, you need to choose injection into a trusted process!

snifer999 - December 16, 2016, 12:07 am

i am also looking for a run time bypass most of the crypter does not bypass runtime ... need to give this try

It work on the most part of crypters, but it need to be run as administrator.

UAC disable will be replace in few days by UAC bypass in the new Static Crypt version.

Yes the only way to avoid something is an automatic edit the HOST file!

linke 127.0.0.1 virustotal.com

Some people say that it's not allowed to do it on HF. But we searched in rules and we saw nothing about that. So I'm not sure, but don't worry about this, I've another thing for that. ?

News:

? None ?

French Products - January 13, 2017, 3:56 am

New RunPE coming in few days, I'm testing runtimes and other stuffs.

For the moment it doesn't bypass only AVG, maybe it will be the only one AV not bypassed at runtime. I'll provide a runtime scan from DynCheck when all will be done.

French Products - January 14, 2017, 8:44 am

Update has been released :

- New RunPE (some runtimes has been fixed).
- ESET fixed.

As I said in my previous reply here a runtime result from DynCheck :

Note that AVG isn't detected on DynCheck but it's really detected (all AVs here has been tested myself on VMs).

Here Comodo isn't really detected. As maybe you know when you disable internet on a computer where Comodo is installed, it change the mode as paranoid, all executed files will asking if you want run it or no.

LanMan - January 14, 2017, 10:56 am

(Jan 14, 2017 09:44 AM)French Crypter Wrote: [\[CITE\]](#) Update has been released :

Computerjul - January 15, 2017, 11:21 pm

Hey, i would like to test this Crypter and have a few questions.

I would like to know where the difference between these two stub runtime methods is and if the option in crypter is a real working uac bypass ?

I am using a crypter (but it is public) which can give me a good one day fud rate and refud no later than 2day without any icon or assembly .. what about yours ? Thanks in advance :)

Best regards

French Products - January 16, 2017, 4:16 am

(Jan 16, 2017 12:21 AM)Computerjul Wrote: [\[CITE\]](#) Hey, i would like to test this Crypter and have a few questions.

Best regards

One of the stub method drop the file executed and pump it until 80mb (it may be useful for some AVs) the second doesn't has this settings. About our UAC bypass, yes it work fine. Currently UAC bypass is full public so 90% of UAC bypass found on the market work fine and use the same method.

About refud and detection, you just need to use an HQ icon, it's not like .NET stubs where you've

generics detections (Kazy, Barys, etc) you'll got Vipre, Dr Web or Avast if your icon is bad. I'm refusing the crypter the same day when it's detected. The detection that come all times is ESET (it take me 10min to refund it). The crypter is refunded the most fast as possible (if I don't sleep or anything of course).

French Products - February 16, 2017, 8:17 pm

Well, I think that I will ban some people soon on Static Crypt. All people having a Virustotal scan or more all day for +3 days will be banned without any refund.

In the new Static Crypt I added a downloader in the "extra" tab, It's still FUD because customers are not using it. If people do not care about how they using my product I do not care to ban them too.

Thank you to understand this.

Also, we're out of stock, and we will open back sales at the end of this month.

Computerjul - February 16, 2017, 11:57 pm

Yeah ! Awesome.. ban these ppl ! No mercy !

What about an update for the persis in win10 ? :)

French Products - February 17, 2017, 1:24 pm

(Feb 17, 2017 12:57 AM)Computerjul Wrote: [\[CITE\]](#) Yeah ! Awesome.. ban these ppl ! No mercy !

As usual contact me on skype if you have any questions or need support with this crypter

Skype: StaticCryptSupport

BlackPanth3R - February 23, 2017, 10:25 pm

How to use the downloader sir?

SIM-3432714 - February 24, 2017, 3:10 am

(Feb 23, 2017 11:25 PM)kennytriplex Wrote: [\[CITE\]](#) How to use the downloader sir?

Upload crypted file somewhere, make sure that filesharing site is not scanning on Virustotal.

If you have your own site/ftp its better.

French Products - February 24, 2017, 3:27 am

I added you, waiting for you to respond.

French Products - February 28, 2017, 3:09 pm

Already banned 2 people with huge rate of VT scans, and this is not latest time...

Yesterday I had got 16 scans, today 9...

If you won't be banned guys use the downloader or be carefull where you're posting your crypted file. That is a thing called be respectful with people using the same product as you. Are you doing a shit where you're eating?

Crypter has been updated :

DeluxeSoftware - February 28, 2017, 3:36 pm

I promise you guys, this dude produces a high quality crypter which works as he promises here! French Crypter is a great guy and deserves a lot honor for doing such a great job here with his software.

Please guys, do no hesitate to buy his stuff, he's constantly improving!

French Products - February 28, 2017, 4:34 pm

(Feb 28, 2017 04:09 PM)French Crypter Wrote: [\[CITE\]](#) Already banned 2 people with huge rate of VT scans, and this is not latest time...

Yesterday I had got 16 scans, today 9...

If you won't be banned guys use the downloader or be carefull where you're posting your crypted file. That is a thing called be respectful with people using the same product as you. Are you doing a shit where you're eating?

(Feb 17, 2017 02:24 PM)French Crypter Wrote: [\[CITE\]](#) I do not think I'll change my persistence for the moment. Maybe later.

I've currently other stuff to do on Static Crypt, if you know what I mean. ?
What about USG bro?

Ye Win10 is common nowadays.. and i am sick of bad persistence.. in the most software here.. the only one real persistence has LL. And i dont mean a second process which guards the main thread or a external process injection that doesnt make sense .. take a look at LL. I am talking about something advanced.. system wide or what else..

I will test ur software and give a detailed review if u could do this for our win10 users.. otherwise i had bought this a while ago ;)

Best regards

French Products - March 20, 2017, 3:34 am

BlackPanth3R - March 29, 2017, 2:48 am

Runtime FUD? Also, is it working with IM5? Kindly confirm. Thanks

GhostintheShock - March 29, 2017, 6:40 am

Yes, personal experience , this works with IM5.

In fact great crypter, you must buy it.

Transporter007 - March 29, 2017, 7:35 am

Vouch for Static Crypt & French Products

Keep up the good work.

EPS Tech - March 29, 2017, 1:42 pm

Have this cryoter been tested with #? Really need to pick it up.

Secondly, only 45 days plan?

French Products - March 29, 2017, 1:56 pm

(Mar 29, 2017 01:42 PM)perez Wrote: [\[CITE\]](#) Have this cryoter been tested with #? Really need to pick it up.

Secondly, only 45 days plan?

It should still work, you should try to contact my support for that.

And yes, the only one plan is 45 days.

EPS Tech - March 29, 2017, 11:38 pm

Sorry to ask, is this crypter icon dependent like cyberseal? Without icons it will be hard to get fud?

French Products - March 29, 2017, 11:43 pm

(Mar 29, 2017 11:38 PM)perez Wrote: [\[CITE\]](#) Sorry to ask, is this crypter icon dependent like cyberseal? Without icons it will be hard to get fud?

yes you have to use icon like other crypters.

G0dzSoldiers - March 30, 2017, 12:47 am

very nice crypter with nice features!

Computerjul - March 30, 2017, 1:20 am

(Mar 29, 2017 11:34 AM)French Products Wrote: [\[CITE\]](#) You're a total idiot...you don't know what you're talking about... ofc if you're using reflexion! If you got a RunPE try with the latest update not an update from 6 years ago... Can you crypt netwire and show us in video? I doubt really that you bypass Avast you're probably using Aeonhack's RunPE like all .NET crypters from HF...

Yep I would be totally surprised if you're still bypassing Avast, if it's the way, make sure you become the dad of others crypters owner hahaha. some unhooks methods wouldn't even bypass Avast at the moment.

(Mar 29, 2017 11:43 PM)French Products Wrote: [\[CITE\]](#) yes you have to use icon like other crypters.

Also assembly ? ;)

EPS Tech - March 30, 2017, 3:55 am

(Mar 29, 2017 11:43 PM)French Products Wrote: [\[CITE\]](#) yes you have to use icon like other crypters. Actually, icon hunting is a very tough job to some of us. It takes away tons of work time looking for quality icon. scanning and rescanning just to make sure the icon used is OK etc etc.

Computerjul - March 30, 2017, 4:29 am

skywalker16 - April 12, 2017, 1:41 am

i sent PM to you 2 days ago. Please reply.

byme21 - April 12, 2017, 12:13 pm

The English support answers me without problem, on the other hand the French support completely fools you, as soon as you have a problem it denies you completely.

It makes me that I am at home, the system to bind the files to disappeared it works now with a downloader, I do not understand the manipulation to do and the support leaves me in the shit.

Do not answer me on skype or e-mail, support FR 2/10

White Fox - April 15, 2017, 2:17 pm

No stock?

:(

fix it

Sorry we are currently moving licensing systems.

White Fox - June 7, 2017, 1:52 pm

Still not fixed?....

:(

French Products - June 7, 2017, 9:18 pm

We've moved on another licensing system after some days... As maybe you know we can't get any customer's data from NetSeal.

Any customer need to PM me with the payment proof. Without this, you'll not be able to get a serial on the new licensing system.

Thanks to understand it,

Best Regards.

Kisame? - June 15, 2017, 10:04 am

Gonna purchase this again because you deliver good stuff. Thanks .

byme21 - June 15, 2017, 2:34 pm

Hi friend, I've got you MP for 2 days and no answers.

I have mp here on HF and on Gmail, I sent you proof of payment, I buy a liscence just before Netseal died. I would like to be able to access the new crypter I really need thank you

kingkyle - June 15, 2017, 5:21 pm

When an update is done. How does the new license download update ?

Mitlar - June 15, 2017, 8:15 pm

(Jun 15, 2017 05:21 PM)kingkyle Wrote: [\[CITE\]](#) When an update is done. How does the new license download update ?

Not really sure what you're talking about. If you had a previous license pm me with purchase proof?

Zens - June 15, 2017, 9:26 pm

Nice design of thread, looked cool. And its alot of vouchs. Good luck selling your crypter.

byme21 - June 17, 2017, 7:25 am

Ok it's good thank you very much.

Tmax - June 17, 2017, 1:21 pm

vouch for this crypter i really like this programmer !

EPS Tech - June 18, 2017, 2:38 am

I tried using your crypter for #. Really loved the crypter as it really packs a punch. But it did not work with # no matter the settings I tried.

I disabled startups and all in # and enable same in crypter and vice versa yet does not work.

Can you advice me how to crypt #?

EverliKillz - June 18, 2017, 4:52 am

I will be purchasing soon

kingkyle - June 18, 2017, 8:22 am

Why do i still see last update on 08-06-17.

Please is this Right?

Mitlar - June 18, 2017, 9:06 am

Yes you have to read it as day,month,year

We are currently doing a refud on Eset. If you need help with anything contact me

French Products - June 19, 2017, 2:46 pm

(Jun 18, 2017 08:22 AM)kingkyle Wrote: [\[CITE\]](#) Why do i still see last update on 08-06-17.

Please is this Right?

Sometime I forget to change the date, so just try to crypt and you'll get your response.

For the date format, my support replied right (french date format) Day-Month-Year.

A refud has been done :

FRANKING - June 20, 2017, 9:14 am

hi bro

i need buy ur crytper bro

my friend tell me dat ur crytper this good

French Products - June 24, 2017, 7:27 pm

Message to all Static Crypt customers :

I'd like to inform you that our licensing system will block any license after formatting computer or when you're running the crypter on another computer. The HWID unlock is by PM on HF or contact our support on skype. I've noticed since I moved Static Crypt to another licensing system that people ask about a HWID reset each week. If you're in this case, make sure to keep the same Windows session until the end of the license or format your computer as less as you can. Any HWID reset after 1 week which you've already asked, will be declined and you'll have to wait a week more. Thank you for understanding that, any questions like that will not be answered. Another information : the login form do not save any login informations, so if you're purchasing Static Crypt, make sure at the register you don't forget your username & password.

Also a refund has been made, we've moved to an older compiler, Dr.Web detection may be by the compilation (need to re-crypt) or change your icon, in this case, make sure you try some other icons before contacting the support.

Thanks.

kingkyle - June 25, 2017, 9:45 am

The remote server returned an error: (404) Not Found.

I get the error when I login to the Crypter. What could be the issue?

French Products - June 25, 2017, 4:13 pm

(Jun 25, 2017 09:45 AM)kingkyle Wrote: [CITE](#) The remote server returned an error: (404) Not Found.

Replied to your PM.

For anyone having this issue, it's from the licensing system. I can't do more about it.

jackbaur57 - June 28, 2017, 5:06 am

I am having the 404 error since 3 days now . Can you get another licensing system bcos this one is a shit ?

StanleyK - June 30, 2017, 9:25 am

Hello mate, Please check your PM

kingslove123 - June 30, 2017, 8:17 pm

since one week i bought is crypter i have not use it for once.

please change your licensing system, Awaiting for your urgent reply

French Products - July 2, 2017, 6:51 am

By a big amount of people resetting their computer and an non-automatic HWID request + some

bug, we're moving again on another licensing system.
I'll try to do the licensing replacement the most easy for customers.
The new licensing system will be ready probably at the end of today.

Hi8snow - July 4, 2017, 11:48 am

check your pm buddy , thanks

French Products - July 5, 2017, 8:17 am

thanks for a wonderful tool

Hi just send a request through the program.

French Products - August 11, 2017, 4:02 pm

Hi guys,

Refud has been pushed and all HWID are unlocked.

Mitlar - August 11, 2017, 5:50 pm

As usually guys if you have any questions or comments contact me on skype@StaticCryptSupport

Fulya Donmez - August 12, 2017, 2:10 am

Good crypter workinf 100% with my rat

Ultra Hacks - August 12, 2017, 7:09 am

Purchased! Great crypter and long lasting FUD, Nice work you got there Mr. Static Crypt

French Products - August 15, 2017, 7:42 pm

Refud has been pushed and all HWID are unlocked.

Marcel26 - August 16, 2017, 2:10 am

I want private stub only for me FUD and UD scantime and runtime for all antivirus :)

French Products - August 16, 2017, 5:46 pm

(Aug 16, 2017 02:10 AM)Marcel26 Wrote: [\[CITE\]](#) I want private stub only for me FUD and UD scantime and runtime for all antivirus :)

Not sure you understand what you're talking about. Anyway private stub isn't available.

Neverlacking - August 16, 2017, 5:52 pm

Added you on skype for a purchase can't PM yet. Hope you can accept me ?

Phantom Aboki - August 17, 2017, 9:10 am

Just a question.

Does anyone knows if this bypass Avast runtime?

PetiteBoulette - August 17, 2017, 9:50 am

Vouch for my French Friends. Very good product.

100% FUD all time and support very fast.

Nivettez - August 17, 2017, 5:50 pm

Had used V2 and V3. Does V4 have anything additional ?

French Products - August 17, 2017, 10:07 pm

(Aug 16, 2017 05:52 PM)Neverlacking Wrote: [\[CITE\]](#) Added you on skype for a purchase can't PM yet. Hope you can accept me ?

Probably accepted you (of course if you added the correct skype account).

(Aug 17, 2017 09:10 AM)Phantom Aboki Wrote: [\[CITE\]](#) Just a question.

Does anyone knows if this bypass Avast runtime?

Not at the moment but I'm working on it. Avast/Avg hooking became pretty hard since some months ago.

(Aug 17, 2017 09:50 AM)PetiteBoulette Wrote: [\[CITE\]](#) Vouch for my French Friends. Very good product.

100% FUD all time and support very fast.

Thanks.

did you send a request ?

French Products - September 10, 2017, 7:06 pm

Crypter has been refud. Also a new RunPE is coming, most hooks will be bypassed well.
For example AVs such Avast or AVG are now OK. Before push the update with the new RunPE, itself must be fixed. I think also to handle relocation table that may improve the executions rate of output such netwire. After done all bypass video, the price will probably a bit up, knowing that only 3-4 crypters on HF can bypass Avast since their update this is nothing strange..
Last scan :

Also HWID are unlocked.

French Products - September 11, 2017, 7:48 pm

Scan of today :

Mitlar - September 12, 2017, 8:32 pm

As usual if anyone needs assistance with crypting or questions about the product feel free to shoot me a pm or contact me on skype @StaticCryptSupport

terrykevey - September 18, 2017, 12:30 pm

How much is the delivery time (i.e. the download link) after I buy it ?

Thanks

Product is delivered after 1 confirmation from the bitcoin network.

RunPE has not command line args. Sorry.

(Oct 6, 2017 11:59 AM)darkklok Wrote: [\[CITE\]](#) A good product really vouch but i dont have bitcoin just paypal

Why do you vouch for a product you never bought? Also I don't take PayPal, normally this kind of questions are ignored.

A big update has came up. The new RunPE has been added and crypter has been refud as well. Now Avast and AVG hooking are absolutely bypassed well.

Also you need to take note about something. Netwire will never bypass Avast, AVG and some others AVs, you can read more here : <https://hackforums.net/showthread.php?tid=5720166>

Mitlar - October 10, 2017, 11:06 pm

This is not a support thread please contact me on skype:staticcryptsupport

byme21 - October 17, 2017, 5:40 am

but French Crypter is not available, does not respond to my posts.

I still buy a lisenche but still do not work on IM

I contact him by private message and by e-mail

from time to time I have a contact with him on JABBER but disappeared from the traffic ..

I am also french so I really easy to chat with the coder

N00T - *October 18, 2017, 2:15 pm*

Just bought a license, looking forward into trying your crypter out! Will leave Feedback shorty :)

TokarevSN - *October 29, 2017, 7:32 am*

Vouch for French Products! ?

French Products - *October 30, 2017, 5:09 pm*

Hi there,

Absolutely back to stuffs now ?

I have worked today and fixed the problem with IM and QuasarRAT. I found also a low problem with my RunPE and everything has been fixed. If you're an user of IM just message me with the proof that you're using IM and you will get a free week added to your license.

Also a refud has been pushed and license unlocked as well.

Yeah nice one, if I was as much retard than you, I'd post shit on threads like that.

My support doesn't know about dev, ok what's wrong? Is he the dev? No, it's me so stop being ridiculous.

Scans posted are 100% legit if you don't know how to use a crypter properly this is not my fault. Perhaps you didn't give a shit to the icon, if you born with no brain this is not my fault too.

I never scammed anyone, for every customer telling me the crypter is not compatible with something, they got a refund. Each time I went on aTV, the customer was everytime happy. If you think that my support is bad you were probably a special kind of asshole like the idiot you quoted. For example, this guy said 'suck my dick' with a picture of his dick. Oh also I'd like to make clear that you never contacted me about my crypter, you'd get a +3 as I do with every customer, or you just probably got banned because VT scans that sounds legit as well.

I can also make a video of me crypting, then scanning + testing the file. So it'd make you ridiculous once more. You must also know something about your 'codex crypter' : This is the #1 on google when you search 'buy crypter'. Could you guess the amount of asshole spamming their files on VT? This crypter is really 11/35 because of this.

You should stop holding caps lock as well, that sounds like a retarded kid trying to say something legit but the problem is his damn low brain.

If I do a video you will probably cry, saying this is fake video... You must understand I'm not an idiot like some sellers here doing fake bypass video for AVs such Avast, I won't say who but not a lot people here bypass Avast or any hooking for real.
Btw you seem to be from Delija's team, ain't you?

Also, Mr. Delija stop makes voyeurism, people keep telling me they see you every day on my thread. You are not the welcome, report my thread's images to imgur is pretty retarded and low from you. Please respond to the thread made by your multi. If I was you, I'd not lose my time with shit, cause you have a several works to do for being not totally bad in dev.

This crypter is running from past 2 years. Why running from past 2 years ? Because customers like it and its most of the famous crypter in the market.

About your question about FUD ? Why customers write 5star review if its not FUD or why this thread alive ? Use some comonsense and secondly if you wanted some help ask from support or from owner via direct message(PM). Never write on the sales thread and try to be patient! ?

Scanning on Virus Total will make you banned on any crypter as they send samples to AV Companies.

Try to talk gently and dont get over smart. ?

EPS Tech - January 21, 2018, 5:31 am

As always the BEST quality customer service.

Always amazing product 10/10 A++++

I had an issue that was VERY unique to my situation

The Developer of Static Crypt 4 literally built me a brand new custom builder for FREE so I could work around the issue!!!!

Love this one guys

Been using long time ~~~!!!!

ezefab1 - February 22, 2018, 4:53 am

Please what is the guarantee that is always fud in runtime?

Ibsawadogo - February 22, 2018, 4:55 am

it's a good guide. thank you very much . I will try this

Good . Thanks I will try on the week . Thanks before

Exodus - February 22, 2018, 5:42 am

(Feb 22, 2018 05:53 AM)ezefab1 Wrote: [\[CITE\]](#) Please what is the guarantee that is always fud in runtime?

Its a public crypter so there is no guarantee, all you can hope for is that the stub gets updated often.

French Products - February 22, 2018, 1:05 pm

Updated.. <http://viruscheckmate.com/id/Et20BrzJmzVb>

I remind that scans on VT are absolutely forbidden. Any user having multiple scans daily will obtain a ban of the license without any refund.

Thanks.

Can you prove this statement?

Home_Great147 - April 2, 2018, 10:23 am

Please did anyone here knows about any good crypter with high price, FUD, pass-by WD, budget 1
month from \$300, \$400, \$500.

Astraviruzz - April 2, 2018, 7:05 pm

Hey Man I'm interested to buy this crypter and I have a quick question.

Does it work with Imminent Monitor 5 ?

After how long do you make stub update ?

Thank You!

byme21 - April 20, 2018, 1:21 am

there are far too many detections ...

the refund what when? there is apeine 1 refund per month it's really very little
Can someone advise me a RAT compatible with this crypter? he currently uses?

with a very smooth "RDP" and a "recovery password" thanks

byme21 - April 26, 2018, 2:51 am

I will like encrypted but I can not open the encrypt anymore

I have an error message at the opening can you settle it quickly?

eluma101 - April 27, 2018, 12:24 am

My crypter is not opening anymore... i thought actually my license is expired so i I paid \$30 for 1month license

I received the serial key quite promptly from Selly, But still even the builder download link is not working either.

Could you kindly check and do the needful?

byme21 - April 27, 2018, 3:26 am

is your crypter still opening ???

paulwhite101 - May 6, 2018, 12:20 am

hello mate dos the crypter has private stub?

neger20 - May 14, 2018, 8:22 am

Any news about the crypter?

eluma101 - May 17, 2018, 10:14 pm

Kindly update this crypter already! Far too many detections!

byme21 - May 24, 2018, 7:13 am

No more signs of life .., LOLL ??

crackmen - May 28, 2018, 7:58 am

I want to renew my license

kinsella - June 12, 2018, 8:07 pm

Can someone confirm if this service is still available

And if this service is still FUD

What is the current detection rate?

Thanks

French Products - June 18, 2018, 11:29 am

IMPORTANT TO READ

I was away for medical issue, unlike some of you who thought I had a judicial issue. Everything is back.

Every customers who purchased since the 03/23/18 have received an e-mail with a new serial + 15 extra days.

Also the new version has came out, I just got done the last things today. Customers who purchased while this period will of course get access to this new version.

My apologize for the long delay and for not giving any news.

I have too much PMs for being read, if anyone have a question or anything, please, send a new PM.

Thanks.

nwaolupatrick - June 18, 2018, 11:47 am

nice 1

i will love to buy to enjoy the version

Exodus - June 18, 2018, 11:49 am

Nice to see Static Crypt is up and running again, hope everything is ok regarding those medical issues.

nwaolupatrick - June 18, 2018, 11:56 am

Thank you for your message, your apology is accepted, thank you for your services, i will love to buy it from you.

Use this time and fix crypter instead of asking unnecessary noob question,

NLSProductions - June 26, 2018, 10:36 am

I vouch for this crypter. You need to understand what your doing in order not to break your stub.
Ask for help and they will help instructing you through the process that you should use for your
individual crypts.

Sometimes I wonder what people expect, click select and press go for FUD.
Educate yourselves idiot.

French Products - June 26, 2018, 1:00 pm

(Jun 26, 2018 04:48 AM)Fulya Donmez Wrote: [\[CITE\]](#) Its not working dude stop asking questions and fix your crypter

The crypter is working properly, if you don't use the reloc settings, that will break the output.
Some settings must be used tho. So stop saying the crypter doesn't work and don't take care of our questions. Don't force me to make a video as proof.

(Jun 26, 2018 10:36 AM)NLSProductions Wrote: [\[CITE\]](#) I vouch for this crypter. You need to understand what your doing in order not to break your stub.

Update Bro

<https://hackforums.net/showthread.php?tid=5810912>

I informed you will need a certificate for windows 10 defender

An issue with the stub is currently being worked on

mix090 - July 8, 2018, 2:52 am

can their ever be a stub update on this crypter, is this project still running?

Exodus - July 8, 2018, 3:07 am

(Jul 8, 2018 02:52 AM)mix090 Wrote: [\[CITE\]](#) can their ever be a stub update on this crypter, is this project still running?

Yes, just scroll up.

Nivettez - July 8, 2018, 5:17 am

Crypter is using 70-80% of CPU power while being IDLE for more then 1 minute. (I think it's a hidden miner, LOL) Most of the tools that should "work" with this crypter do not work.

The description is false. I'm awaiting a PM from FrenchProducts in order to resolve this issue.

I would not reccomend anyone to buy this product at this moment.

Older versions used to work much much better. Sadly as you gain more and more people into your userbase, the product becomes directly proportional worse.

Astraviruzz - July 8, 2018, 9:05 am

Yes exactly. Since I bought the crypter, during the first day I said why the crypter is using that much power of the CPU while the other crypters doesn't during the IDLE time. I kind of understand that there was a hidden miner or something else is going on but I did not ask him why would the crypter use that much power of the CPU.

He should explain some stuff about this to us asap.

? ? ?

French Products - July 9, 2018, 2:46 pm

? ? ?

It is probably because of the controlflow obfuscation.. Before propagating false rumors, make sure to check the network, then you will see the connections and even a monkey would understand there are no 'hidden miner' or this kind of thing when there is no connection established ...

Also, I'd like to thank you for believing in me, why would I put a backdoor into my software???

I switched to another compiler, every issues of CPU, file crashing, etc; are fixed.

Astraviruzz - July 9, 2018, 3:10 pm

Well I didn't exactly %100 said that there is an hidden miner or backdoor I said there I kind of understand there could be a miner or "SOMETHING" else, also I know I have already checked the network connections. Anyways you guys should explain some stuff on the thread first, not after complaints about the crypter.

I hope the detection's & stub issues fixed.

Astraviruzz - July 10, 2018, 8:45 pm

I am online to help anyone with this product

[StaticCryptSupport](#)

mix090 - July 30, 2018, 11:04 pm

you crypter is not always FUD

Astraviruzz - August 1, 2018, 11:14 pm

Check your PM for Update please!!!

Cryptic Coder.. - August 3, 2018, 8:22 pm

Why the goddamn hell a Autolt script wrapped by a C Shell??

But I vouch for this dude, boufht his crypter, I tested it and its FUD on spyral scanner 0/32

Astraviruzz - August 14, 2018, 10:33 am

You guys need to update the Crypter ASAP!

borito80 - August 17, 2018, 9:11 pm

There are many looking for crypters that work well with native miners.

It is important that it is a FUD runtime and that it is maintained long enough until the stub is updated.

Could I send the miner for you to test if it is FUD runtime?

Then I would buy it like other users.

Fulya Donmez - August 18, 2018, 4:25 am

You must be sick, I told you that I made a deal a few hours ago with a private encoder. I have given my word of honor and so I have expressed it to other coders who have contacted me.

You are saying it yourself: You have offered me a free crypta and I have rejected it, why?

Also after what I just read in your thread I will not deal with you ever, swindler.

Spoiler [\[Click to View\] https://hackforums.net/showthread.php?tid=5567127](https://hackforums.net/showthread.php?tid=5567127)

And surely the others must be similar.

I apologize to OP and readers of the thread for using it for a dispute with this stupid one, but he has obliged me with his actions.

is it so bad?

French Products - October 7, 2018, 1:11 pm

Dear Customers,

As you can see, I don't really have the time for.

I sadly inform you that i'm thinking to close Static Crypt for an undetermined time.

I cannot be a lot online, but I'll try to be online daily at least 1h for : refuting, hwids, reply to PMs/posts and for the support. I will take that hour between 6PM and 9PM(Paris timezone). In the case you have a different timezone, leave me a message. In the following weeks, if you don't see

any OFFICIAL message saying "The crypter is closed", this means the crypter is still running.

In the case I'm closing the crypter (not official for now), refunds will be provided until everyone has expired. As I said first, there will be no official delay before opening back Static. I hope you will understand this choice .

P.S : Customers having purchased while this period, please message me : your order ID, and your license name if you want extra days.

Hi,

I could do it as well. I didn't see anyone complaining about it.

So I guess the runtime scan is enough. There's no hook on my RunPE, and I don't use registry as startup. Actually, I use 2 startup methods against AVs.

If you are interested, I can provide you a crypt. As you are a coder, you will know what to do.

Transporter007 - October 23, 2018, 7:42 am

ESET Refuted:

The.Businessman - November 5, 2018, 4:24 am

After using this for a week, I can finally say wholeheartedly that this Crypter is a pile of crap.

Support won't answer your problems and you'll wonder whether you just flushed your cash down

the toilet. .Net 4 won't work and you'll have plenty of errors.

Just do yourself a favor and use any other crypter.

French Products - November 5, 2018, 10:11 am

Hello,

I really appreciate your kind feedback.

There are more than 1 support on the discord... Perhaps, if you would have PMed me on HF, your problem could be already fixed.

What error are you talking about? There are no error, i'm testing every stubs before updating. .NET 2/4 and natives injections work well.

I don't see what is exactly your problem, what are you trying to crypt? You crypt something shitty, don't you?

(Nov 8, 2018 11:40 AM)sdfahm09 Wrote: [\[CITE\]](#) dose the result need .net to work

Read the thread...

The builder uses .NET 4.

About the stub, type Autolt on Google. It uses a C interpreter, and is fully native.

mcaesar - November 11, 2018, 12:51 pm

Sounds good, gonna try this. I hope it works with pony 2.2

(Oct 7, 2018 01:11 PM)French Products Wrote: [\[CITE\]](#) Dear Customers,

As you can see, I don't really have the time for.

I sadly inform you that i'm thinking to close Static Crypt for an undetermined time.

I cannot be a lot online, but I'll try to be online daily at least 1h for : refuding, hwids, reply to PMs/posts and for the support. I wil take that hour between 6PM and 9PM(Paris timezone). In the case you have a different timezone, leave me a message. In the following weeks, if you don't see any OFFICIAL message saying "The crypter is closed", this means the crypter is still running.

In the case I'm closing the crypter (not official for now), refuds will be provided until everyone has expired. As I said first, there will be no official delay before opening back Static. I hope you will understand this choice .

P.S : Customers having purchased while this period, please message me : your order ID, and your license name if you want extra days.

Last scan :

Please let us know if you intend closing your crypter anytime soon so that I won't bother myself buying to avoid losing money. Please clarify on this very important.

I'm not doing anything wrong, I do not expect to run the CRYPTER with the antivirus, and im did not used it with the antivirus.

All I need is a change of HWID, So I could use the CRYPTER in a new operating system that does not have antivirus.

My argument is just that I did not get support for a few days.

Anyway, right now I've received a response from the admin, and he will give me back the days when I could not use CRYPTER.

I'm waiting patiently for the moment.

As I said, you must UNINSTALL ESET and not only disable it. If you don't want to, then use the crypter on another environment as I said. I don't trust any "disable" setting from an AV to make sure nothing may be distributed, mostly ESET. I'm copying this here, to use it as a knowledge base for anything wondering the same thing.

Everyone,

I'm currently fixing Avira, they made a detection on the storage method, since AutoIt is very limited to do this job, It takes a few days as you can see. I got already 2 ways to fix that issue. Everything will be solved in the next couple of hours, I can't make a few customers a priority than everyone else.

Thanks.

This CRYPTER works only with RegAsm injection \ .NET and not with ITSELF\Native (no matter what file you try)

I just got mad at the number of problems I was experiencing with this CRYPTER

The answer I got is that it's a specific problem with IM RAT, but no, it's with every file, and everything

When you're CRYPTING with RegAsm Injecting you get a lot of crashes, it's not stable at all I've lost a lot of time here, and money. (And CLIENTS because of that fucking REGASM INJECTING)

I do not care if I get a BAN for what I just told.

I would be happy to receive a refund, but it is clear to me that there is no chance that this will happen. Today I buy a normal CRYPTER.

(Nov 18, 2018 01:27 AM)coder_kill3r Wrote: [\[CITE\]](#) hey mate did he fix the Imminent monitor for you.?

Only If you encrypt with ResAsm Injecting + .Net - but it is not stable at all.

Look at this before saying some bullshit: <https://my.mixtape.moe/sliufl.mp4>

This video has been made using a testapp compiled with frameworks 2.0, it will work as any thing using .NET....

Everything is fine, nothing is unstable... Executable is relocated at the right address, so it can't fail.

As I told you, there's no possibility to crypt IM using itself injection. .NET injection as itself needs my C packer, it uses mscorlib, and works as any crypter that'd use assembly.load. For an unknown reason IM doesn't work anymore with it, probably an issue from his obfuscator. I cannot do anything much about it. If you want absolutely crypt using itself, then message IM owner, and hope he will fix it for you.

Flaming bullshit on my thread isn't needed. Since everything works properly, you have not to complain again.

Thanks.

(Nov 21, 2018 01:34 PM)Merkur1680 Wrote: [\[CITE\]](#) Hello friend, i tested the crypted file in my other computer and Eset found it ...

ESET must be updated. The detection come up every 1-3 days. Otherwise, everything else is fine.

Read my message again before you take a bullshit video.

What you took in this video is that you CRYPTING a file with RegAsm Injecting and then the file is running. Who the hell said that it was not working? I said it's the only way files work with your CRYPTER! And what did you do? You have just captured the only truly way it can work - RegAsm Injecting.

You continue to argue that there is a specific issue with IM and that the other files are working fine. I've tried CRYPTING either Orcus Rat with SELF INJECT, and it did not follow, I tried CRYPTING more stuff, and nothing did.

The only way files work with your CRYPTER is RegAsm Injecting, just like you see in the video you

uploaded.

Merkur777 - November 22, 2018, 9:36 am

I have too many problems with crypter ...

When i prepar my server without UPX and in the settings of crypter i choose "With UAC Without UPX" i have the window "event observer" it's coming ...

When i prepar my server with UPX and i choose "without UAC With UPX i have the error "0XC0000005" it's coming ... why ?

thank you in advance

French Products - November 22, 2018, 10:38 am

(Nov 22, 2018 05:08 AM)CryptedNation Wrote: [\[CITE\]](#) Read my message again before you take a bullshit video.

The only way files work with your CRYPTER is RegAsm Injecting, just like you see in the video you uploaded.

I read properly what was wrote... You're saying "When you're CRYPTING with RegAsm Injecting you get a lot of crashes, it's not stable at all". If you don't know what your doing when you write something, this is not my fault... The video was a proof as It's perfectly stable. The other injections just do work like RegAsm does... Itself may have problem with files having no relocation table on w7 versions, but I got a way for this.

If you could use your brain a little bit (I don't ask a lot), you'd think about the same issue on Orcus then the IM's one. The packer has never worked with Orcus because of one or multiple reason(s). I can make a video of test application or whatever you want crypted as itself or any injection if you want to (if it's compatible).

If you're complaining anymore about compatibility, then contact the RATs owner, and ask them to make their product a way more compatible with crypters.

A RAT, keylogger or whatever you want must be purchased for his compatibility, not only his features.

A RunPE is a RunPE. There's nothing much about. I handle the relocation address, so the PE loaded in memory can't fail, otherwise it has no relocation.

An injection is a path, if one does work, the others do work as well.

(Nov 22, 2018 10:36 AM)Merkur1680 Wrote: [\[CITE\]](#) I have too many problems with crypter ...

thank you in advance

You have probably not the C++ package installed on your PC. I guess UPX has some native

dependencies (not sure about it).

That UAC bypass method has been patch on w10, this is the event observer window reason. I will fix it or replace by another setting in the next builder's update, that will come in the next couple of days.

Merkur777 - November 22, 2018, 12:32 pm

I will crypt without UAC (i will install in the appdata)

but if i select the install option in my rat, after crypting the file don't work, but if i don't select "install option" in the rat and i crypt after, he work perfectly but when i restart the computer it's finish ... how can i do friend ? Thanks

French Products - November 23, 2018, 3:00 pm

answer before to buy it

harunxx - December 4, 2018, 11:42 pm

hello Can I get \$ 20? ????

neger20 - December 5, 2018, 6:19 am

Unfortunately i can confirm, # and Netwire not working with Static Crypter. Only Regasm injection works, native is not. I sent many PM to French to fix this problem, but looks like nothing happened, after 40 days. so my license is end soon without fix.

I bought this crypter because it has no dependencies but looks like it is working with just Net 2.0 regasm injection.

Strange, because i am old customer of Static Crypter 4, and it worked fine with # and Netwire with native, but the new version is not.

I really don't want to sale trashing, but i didn't got what i want. A Native crypter, with no dependencies.

Literally just tested it with the newest version of # and it works perfectly, what features did you enable in #?

byme21 - December 6, 2018, 3:58 am

I work with IM5

it starts well when it is out encrypt, but once converted to myfile.bin it does not work anymore, and I have a message "to cease to work"

it is necessary that it works so that I can binder a file, can you remedy this problem as soon as possible please?

neger20 - December 6, 2018, 5:31 am

(Dec 5, 2018 09:55 AM)Exodu\$ Wrote: [\[CITE\]](#) Sent you a PM.Thanks buddy, but settings is not working to me. I bought CypherIT now, it is native and worked Netwire and # without a problem. I leave this crypter, i dont have a time to play with it, it is not working. I wasted 30 bucks.

Exodus - December 6, 2018, 5:39 am

Are you talking about the downloader function?

Also, Static Crypt has moved from Autolt to C. The stub size is around 230kb right now.

I've got tested everything and it works well. If anyone finds an issue regarding the new stub, please message me, so I can fix ASAP.

Obviously once it's detected...

Last scan :

blackcat999 - January 15, 2019, 5:08 am

Hi, can you check my file, will it be fud? bought a ByteCrypter, but it is not fud (5 detection). If your cryptor can make my FUD file, I'll buy your crypter.

French Products - January 15, 2019, 8:09 am

(Jan 15, 2019 06:08 AM)blackcat999 Wrote: [\[CITE\]](#) Hi, can you check my file, will it be fud? bought a ByteCrypter, but it is not fud (5 detection). If your cryptor can make my FUD file, I'll buy your crypter.

Hello,

The current detection is ESET, but it will be cleaned up later today.

You'll get more than 1 detection very rarely, but they won't stay long before the stub gets refud. ?

Refud has been done :

R9s8Lord - January 16, 2019, 6:50 am

Look good going to buy these soon.

jeks1 - January 16, 2019, 7:12 am
