The Brotherhood's OS X Help Desk

Hey guys it's -Hyperion

As you may have noticed there have been a lot of OS X questions lately. I have created this desk to deal with as many as possible. If you are having problems and think you are infected I will do my best to assist you in a timely manner. When posting put your current OS X version and a detailed description of your problem.

Aura - January 9, 2015, 1:59 pm

OS X feg user ? Also, there's a space between OS and X, please fix for my OCD.

-Hyperion - January 9, 2015, 2:27 pm

I don't even run OSX I just work on them.

Wafflemonger - January 9, 2015, 2:28 pm

The OSX operating system does NOT have a space between the OS and the X <3. Or does it <_< >_> <_<. Anyways, I'm happy that there's finally someone to help for OS X XD.

Aura - January 9, 2015, 2:29 pm

I know it does, was just messing :P. Good luck with the thread :).

-Hyperion - January 9, 2015, 3:36 pm

Waffles when did you get your A+ cert? And I changed it for you aura

Null Byte - January 9, 2015, 3:40 pm

Uh I think he's had that in his sig forever.

Accelerator. - January 9, 2015, 6:16 pm

Yea, I have an issue. I own a Mac. How do I fix it?

-Hyperion - January 9, 2015, 6:33 pm

(Jan 9, 2015 07:16 PM)Accelerator. Wrote: [\[CITE\]](#) Yea, I have an issue. I own a Mac. How do I fix it? Not really an issue is nothing wrong with having a mac nowadays

Wafflemonger - January 9, 2015, 6:34 pm

Wafflemonger - January 10, 2015, 12:06 am

(Jan 9, 2015 07:35 PM)-Hyperion Wrote: [\[CITE\]](#) oh guess you will be retaking it with me this year huh Why would I ever renew a cert like that? It's totally pointless. I got it so that I could get into the interview room while I was st ill in College :). It's a useless cert <_<.

-Hyperion - January 10, 2015, 6:55 am

Well the company I work for requires all certs to be maintained lol

Wafflemonger - January 11, 2015, 4:33 am

Pff. I doubt a company would care if you had A+ certified XD. The only thing I can see this useful for is the CE (Continuing Education) hours.

Kunz - January 14, 2015, 9:52 pm

I get the following error when i run startx. I'm trying to install XORG, and I even have a valid xinitrc file. I'm gradually moving over to the i3 WM.

```
Code /opt/X11/bin/xinit: unexpected signal 2
oz:~ home$ startx
font_cache: Scanning user font directories to generate X11 font caches
font_cache: Updating FC cache
font_cache: Done
xauth: file /Users/home/.serverauth.4460 does not exist
```

```
/Applications/Utilities/XQuartz.app/Contents/MacOS/X11: line 11: /bin/zsh: No such file or directory
/Applications/Utilities/XQuartz.app/Contents/MacOS/X11: line 11: exec: /bin/zsh: cannot execute:
No such file or directory
```

waiting for X server to begin accepting connections .
