Thread: [Offering Free DarkComet Help! Setup/Crypting/Spreading](#)

Mr. Christmas - January 9, 2015, 2:41 pm

Whether you need help setting up the whole thing or your just stuck on one step, I have set up my Darkcomet so many times I could probably do it in my sleep and I'm ready to help! This is not a paid service so I reserve the right to refuse helping anyone for whatever reason and I may not have ALL of the answers (this is why it's free).

What I can do is provide a link to a safe download to Darkcomet. Portforward. Set up Darkcomet and build your server. Refer you to a great crypter and give you tips and techniques on how to spread. I can either do this by guiding you and answering your questions through Skype or I can teamview your computer. Your choice!

What I will NOT do is force you to download anything.

I am a busy person so I will help when I can. Please post on here and then add me on Skype:
Project_Gambit

3xtr3m3 - January 9, 2015, 2:56 pm

Thank you very much for this; it's people like you that make this community an awesome place to be.

I have sent you a friend req on skype.

Mr. Christmas - January 9, 2015, 2:57 pm

The only thing is return I ask for is if I helped you successfully, to please post a vouch on how your experience was!

Much Love.

No_Idea0.0 - January 9, 2015, 3:33 pm

will msg on skype. Just have random question

Simply™ - January 9, 2015, 3:35 pm

Sent you a request a few minutes ago. Looks like you still haven't accepted it.

Mr. Christmas - January 9, 2015, 7:42 pm

I was just away for a bit. Like I said guys, I'll help as much as I can. This isn't my business so I won't be accessible 24/7. I'm just offering a helping hand when I'm available.

Loyalty. - January 10, 2015, 6:22 am

What crypter do you use? Sorry to make a post I sadly still cannot PM :(

robiniseenbanaan - January 10, 2015, 9:25 am

Hi,
i would like to get some help with my file, it doenst seem to work when other people open it. Do you know a way i could test if something like my firewall is blocking it?

Mr. Christmas - January 10, 2015, 9:26 am

Perfect! I got your request. I am helping you now!

MrNacho123 - January 10, 2015, 9:46 am

Hey, I was wondering if you could help me spread? My DarkComet is port forwarded and completely setup. I need help on the spreading however. I repeatedly attempt to spread but nobody downloads it. Can you be my RAT mentor?
Thanks for reading and let me know by PM when you get a chance.
(I don't have Skype, and prefer not to make it on this computer)

Paranoid? - January 10, 2015, 9:48 am

DarkComet isn't worth using anymore. I lost all my slaves from yesterday, today.

Hemsworth999 - January 10, 2015, 9:50 am

I added you, need some help :) Thanks

canibeanon - January 10, 2015, 9:51 am

could i get your skype in pm please? i could use some help :D

my skype is in the thread post mate! add me and I will help as soon as possible.

AcidicAguas - January 10, 2015, 10:32 am

thank you ?[font=Impact]

canibeanon - January 10, 2015, 12:01 pm

Excellent! Very helpful and even helped me crypt it! :D
<3 thanks op

No_Idea0.0 - January 10, 2015, 8:18 pm

posting and will add you on skype. Thankyou in advance

Vouch for OP. Is extremely helpful. Thankyou

robiniseenbanaan - January 11, 2015, 10:11 am

Great help, fast replying. Thank you?

Epic Legendz - January 11, 2015, 11:03 am

I need some help with crypting! I added you on skype, cant wait!

sdaehrevo - January 11, 2015, 11:21 am

Have a few concerns and I'm a bit confused on what DarkComet is doing atm. RAT was working and showing up when tested on Anubis, Didn't change or touch anything and now whenever I build a new server and try to test it on Anubis it doesn't show up a a slave. Just other questions in general aswell. Would love your assistance.

sinisterps - January 11, 2015, 11:25 am

thanks for the help man your the best - vouched !

Preperition - January 11, 2015, 11:42 am

Just contacted him on Skype waiting response now!

Cyber00001 - January 11, 2015, 12:14 pm

Great guy ! he helped me alot after asking for help. Vouch for him

Epic Legendz - January 11, 2015, 12:17 pm

Amazing!!! Great guy. Good and fast support!!! I definitely vouch for him!!

Ted™ - January 15, 2015, 2:34 pm

Vouch for Mr. Christams here HQ member

TrojanHorseDetected - January 15, 2015, 3:00 pm

Adding, thank you for your help! I'm having lots of trouble with spreading..

hellrisen123 - January 15, 2015, 3:03 pm

Why is there a IT-technician helping people setup RATS? shouldn't you be on something a lot higher to work on? lol.

?

lovemailforu - January 15, 2015, 3:24 pm

Hello - please help me setup .. PLz add me in ur skype : lovemailforu

Thanks -

lamabitsy - January 15, 2015, 3:26 pm

I've already opened a thread but since I didn't find a solution I'm gonna ask you.. so

I have a PC on which I built the stub , I put the rat on a pendrive and installed it on my laptop (which has multiple users) , I set it on my user account , and it works fine , I can remote control it , I can do everything , but as soon as I log off from my account and log back in with another account (admin e.g.) , it doesn't show in the users list on my main pc (the one that I used to create the stub).

I hope you got the solution . Thx in advance

hellrisen123 - January 15, 2015, 3:27 pm

What RAT are you using, exactly? im guessing your using DC, that's why ???.

I suggest you use njrat.

lamabitshy - January 15, 2015, 3:30 pm

Yes , I'm using the last release of dc. So there's no way to make it work ?

hellrisen123 - January 15, 2015, 3:32 pm

(Jan 15, 2015 04:30 PM)lamabitshy Wrote: [\[CITE\]](#) Yes , I'm using the last release of dc. So there's no way to make it work ?

Yes there is, like I said, don't use DC, its horrible and outdated, use njrat. It's free, and still has updates, and many more features that DC doesn't have.

njRAT link:<https://hackforums.net/showthread.php?tid=3924408&highlight=njrat>

lamabitshy - January 15, 2015, 3:41 pm

Ok then ? I'm gonna give it a try . Thanks a lot
