Thread: [Crack these hashes if you can!](#)

AnonHacker15 - January 10, 2015, 3:28 am

I have some IPB hashes, can you crack them? Many have tried, but sadly failed. Will you succeed?

Ran all of these the last time you posted them, only cracked the one Forezza had already cracked. Is there a chance these are from a forums or something that is in a specific other language so i can tune my attack for that? I can't get any of these with my normal attacks(and my dictionary includes a lot of common languages).

These are from a forum that doesn't allow strange characters like !"#%&'(), so it's only the english alphabet and numbers.

GreenZ - January 14, 2015, 10:07 pm

Can't you just find a website to decrypt them? It doesn't take long at all.
