SALE: \$10.00/m

Hi,

I'm selling access to a very unique PlayStation Network Message Bomber. This online website, created by me. Will let you message bomb your friends or enemies with any custom message you desire.

Currently, we have over 29 unique account it sends message to each time we send. It works on PlayStation 3, PlayStation 4 and the PlayStation APP For Android & Apple Products.

Price: \$20.00 USD

Length: 1 Month

Access: Full access to psn bomber, with a limit of 600 messages at once. Skype resolver & IP Logger.

If you want me to test it on you, i will. It's very accurate, and only one existing on the entire internet after deep research.. I haven't found any other competitors.

I'm accepting PayPal and BitCoin.

All you need to do is to enter your victim's PSN ID, select amount and hit BOMB! The messages will start popping in shortly after, within 5 seconds.

I might take my time to do so, not really sure. I might need a XBOX One to find out how it's being delivered.
