Well you're a couple o points better than me. I'm just sitting here in the bottom of gold :) and I'll stay here forever. Because I like it down here. :D

_wind - January 11, 2015, 7:49 pm

Surprisingly, the ward score of pro players is really low. Really. really. low.

mrDH - January 12, 2015, 4:25 am

My girlfriend got this. <http://prntscr.com/5rj5w4>

She mains ADC/Supp

So far she has the highest score out of this thread. :o

And then I got this... <http://prntscr.com/5rj64k>

Think I should start to ward more.

I main top so I do forget to ward a lot.

Rafis - January 12, 2015, 10:07 am

My ward score is 1586. Personally that seems really good considering I think of myself as someone who never wards.

jakajakajuuu - January 12, 2015, 10:33 am

1567 ward score.

Your warding is : Great.

Overall you ward more than 89% of recorded players.

For those who want to boost their scores just enter a game (that you will finish) and spam the sightstone in base.

challenger games are a hell of a lot shorter than any other games. A gold game can last 60 minutes easy, while challenger games end in under 20 minutes all the time. Their wards/min are high, but wards/game are low

Why does everyone have op names? Mine is just "Vut". Since that's what I usually say all the time.
