Thread: [\[FREE\] Trying to Deobfuscate any source you want!](#)

Wardow - January 11, 2015, 7:19 pm

Recommended Paid Crypter:
[\[img\]http://gdurl.com/Z3c9\[/img\]](#)

Hi guys, i have a serious experience in Deobfuscation/Obfuscation in AutoIT, and i would like to use my knowledge, if you have any source that you want deobfuscated, feel free to post below, and i'll do my best!

Asking Form :

Code [color=white]Link of the original source code :[/color] (SendSpace, Ge.tt)
If you can't decompile it :

Code [color=white]Link of the Executable :[/color] (SendSpace)
Please don't post infected links, and be aware you wont be able to infect me, do not try, infected links have to be reported.

Please post saying thanks if i sent you a deobfuscated source, this will help keeping the thread alive.

Rules :

If you give me a program to decompile/deobfuscate, you have the right to do it.
I wont be responsible if you were not allowed to do such things, you're responsible if you give me a file,
I'm not here to check if the source/sample is being sold over hackforums or else.

conteaza - January 11, 2015, 11:37 pm

because my account is new i cant post link :) download source from here
[h.t.t.p://www51.zippyshare.com/v/tiGOsVyq/file.html](http://www51.zippyshare.com/v/tiGOsVyq/file.html) i dont know how to deobfuscate

Wardow - January 12, 2015, 1:33 am

(Jan 12, 2015 12:37 AM)conteaza Wrote: [\[CITE\]](#) because my account is new i cant post link :)

Here a deobfuscated source : <https://www.sendspace.com/file/bhrhi1>

For Vars/Functions this is not obfuscation, this is just var/func renaming, i can't do anything for this.

Ignore all the start of the script, look at the end and start looking the code from the end.

This is not an Autoit file, and if it's it's very well protected.

Where did you got this file?

smnDATHax - January 12, 2015, 6:32 pm

its cubexsoftware a gamecheat and thiss is 100% an autoit file , its the compiled exe , he i saw little msg at skype that he using a opfuscator , themida and a crypter to protect his file =(is there noway to get the source??

Wardow - January 12, 2015, 7:09 pm

This is not a game cheat, it's infected and it's injecting into AppLaunch.exe WTF?

Okay i got it, i am getting the source.

<https://www.sendspace.com/file/d1li6u>

This is all i can get.

smnDATHax - January 13, 2015, 6:35 am

THANK YOU :* thanks dude no one of my german friends can crack it <3 you are an specialist !

(Jan 13, 2015 07:35 AM)smnDATHax Wrote: [\[CITE\]](#) THANK YOU :* thanks dude no one of my german friends can crack it <3 you are an specialist !
Thanks, i didnt cracked it, just decompiled, and deobfuscated, anyway it's very simple to get a version without licence now :p

DamienVC - January 13, 2015, 8:16 am

If I have full ownership to a miner project, and only received the obfuscated builder, can I give it to you for deobfuscation?
I am the current sole owner of that project, can prove it too.

Wardow - January 13, 2015, 8:21 am

(Jan 13, 2015 09:16 AM)DamienVC Wrote: [\[CITE\]](#) If I have full ownership to a miner project, and only received the obfuscated builder, can I give it to you for deobfuscation?
I am the current sole owner of that project, can prove it too.
Is it Autoit? If not give me i'll try to do something anyway, if it is i'll be easy.

DamienVC - January 13, 2015, 8:27 am

(Jan 13, 2015 09:21 AM)W????? Wrote: [\[CITE\]](#) Is it Autoit? If not give me i'll try to do something anyway, if it is i'll be easy.
Figured out that the builder/stub is C++ with the stub generated with no dependencies.
Just went by your signature.

Wardow - January 13, 2015, 8:30 am

(Jan 13, 2015 09:27 AM)DamienVC Wrote: [\[CITE\]](#) Figured out that the builder/stub is C++ with the stub generated with no dependencies.

Just went by your signature.

It's impossible to decompile C++.

You can just dissassemble, get the machine code of the Program, and some programs are able to imagine the C++ code using the Machine Code, nothing efficient.

smnDATHax - January 13, 2015, 1:33 pm

dude? can u maybe try this one? its the same cheat i think same crypted and opfuscated , but other source , i mean newer functions and more , would be nice =)

but the exe is 200bytes smaller , would be verry nice when u can do it , when u have time
thx in advance :*

the link :

[h.t.t.p://www27.zippyshare.com/v/MwOwwsV5/file.html](http://www27.zippyshare.com/v/MwOwwsV5/file.html)

I am deobfuscating, not cracking bro.

if you want skip some login windows, try to find GuiSetState and change the macro on the main windows from @SW_HIDE to @SW_SHOW , hope this help you.

Corkyconor - January 30, 2015, 5:46 am

Hi i have been trying to de-obfuscate this but i just cant do it could you take a look when you get the time please thanks :)

LINK: www63.zippyshare.com/v/OU8tIWLN/file.html

Cubex-Software - February 2, 2015, 1:58 pm

Nice playing around with my products. BTW reported as it is against the rule to leak, crack.

btw the cheat is outdated, and vac detected. If you want to use it learn Autoit and how ac works so you can actually do something with that.

LOL

smnDATHax - June 5, 2015, 9:13 am

hi can you maybe give me the source of this file? www81.zippyshare.com/v/fIH35834/file.html i already decompile it with exe2aut it works but i see only some strings not what looks like any autoit commands

thank you in advance

but why are all the variables like shit? not even right words?!

You can't deobfuscate variables, they are like that.

You can rename variables to whatever you want the code will still work, so you can't reverse this.

smnDATHax - June 19, 2015, 11:28 am

ok anyways thanks

I don't think i could decompile this file, AutoHotKey has an Encrypted script which you can't decompile if you don't have the password.

I tried using popular decompilers didnt succeded, so i guess i can't.

(Nov 17, 2015 02:02 PM)labbepierre Wrote: [\[CITE\]](#) Hello Wardow , i post you private message ,please i would like the source of exe i give you the link . Thank you for job.

I think its becoz theres improvement in autohotkey L, finally something, Bro can't decompile, very nice info, unfortunately ahk syntax is more towards C language type, I would still prefer to do it in autoit since the syntax more english like.

(Nov 17, 2015 02:51 PM)labbepierre Wrote: [\[CITE\]](#) Ok Wardow.

Thats a silly remark tbh.

Go to lounge, you could obtain that 6 posts easily.

Baddox - November 20, 2015, 9:03 pm

Can you make a (good) deobfuscating/reverse engineering tutorial (best deobfuscator,... etc...)

Wardow - November 21, 2015, 9:17 am

(Nov 20, 2015 10:03 PM)Baddox Wrote: [\[CITE\]](#) Can you make a (good) deobfuscating/reverse engineering tutorial (best deobfuscator,... etc...)

You can add me on skype for tips and tricks about AutoIT Reversing and Deobfuscating, nothing really hard.

Skype: wardow56

3bdellal - November 25, 2015, 4:43 am

this source autoit... my favorite game macro..

decompiler myexe2aut decompile ok but obfuscator... plz deobfuscation~..

Mace - November 29, 2015, 4:33 am

Hi wardow, here's my little challenge for you,

It shouldn't be too easy to deobfuscate, but neither too hard.

If you succeed, i'm making a harder test for you ;).

Prove me wrong that you can't deobfuscate this one ^^.

<http://pastebin.com/RBmLcwTP>

Wardow - November 29, 2015, 8:48 am

This is the weirdest autoit file i ever seen, Chinese people are smart i guess, i'm not able to get the complete script of this one!

Rikanono - December 1, 2015, 8:27 am

(Dec 1, 2015 08:00 AM)Wardow Wrote: [\[CITE\]](#) This is the weirdest autoit file i ever seen, Chinese people are smart i guess, i'm not able to get the complete script of this one!
its not hard to do this. and also not that hard to deobfuscate.

the thing they did is compiling the script as a3x file.

then making a new one with only #include script.a3x and compile as exe.

thats what makes the "random" numbers in the script. all numbers you see in the decompiled source are "if" "do" "endif" "global" "local" etc.

so for example:

If

Else

EndIf

Global

Local

Do

Until

While

WEnd

would be:

4
6
8
29
28
11
12
9
10

so you need to replace this numbers with the correct command. but only the numbers which are commands not strings or number in math function etc.

Duk. - *December 1, 2015, 8:31 am*

Vouch Wardow be da best :)

Mr.Magnificent - *December 1, 2015, 8:34 am*

Hello, I have a question. Can you do simple Android apps or windows phone 5 apps.

Thank you very much in advance !

Wardow - *December 1, 2015, 10:55 am*

(Dec 1, 2015 09:27 AM)Rikanono Wrote: [\[CITE\]](#) its not hard to do this. and also not that hard to deobfuscate.

29
28
11
12
9
10

so you need to replace this numbers with the correct command. but only the numbers which are commands not strings or number in math function etc.

The problem is that there isnt the decryption function for the strings in the script, i know what you're doing.

Thank you very much in advance !

Tbh, autoit are not available on those platforms.

You can ask those questions in service request if you want those apps made but usually coding service fee is require.

Lets be on topic, thank you.

File is crashing and probably not an AutoIT file.

DuguWudi - April 1, 2016, 6:22 am

(Apr 1, 2016 04:18 AM)Wardow Wrote: [\[CITE\]](#) File is crashing and probably not an AutoIT file.

Hehe?, it's autoit file indeed, except you can't run it in vm. I use a freeware crypter on the compiled autoit file. The autoit script is compiled using the latest beta version of autoit, then crypt using a native crypter.

If you still can't unpack it, I'll let you know the crypter name.?

I'm not sure about win8/10, but file should be able to run in windows xp and windows 7.

Wardow - April 1, 2016, 6:50 am
