It's as close to a hentai game you will ever get from steam.

I reviewed the VN Sakura Spirit here:

Tl;Dr These are just CGs from the game. They are not meant to be wallpapers but you can use them that way.

Sakura spirit is a visual novel with something like PG 13 nudity and you can speed run it in under 3 mins by holding control or spacebar, i havn't actually taken the time to read the whole novel but it isnt the worst if you like reading :)

You know what would be cool and that they need to add on steam?

Games with routes (Not sure what it's called) like the oreimo game. I hate when it is just a visual novel and passes for a dam game ?

Yeah it wouldn't be bad and oh i forgot... You get only 1 option in the game and no matter what option you choose the story line doesnt change much at all.
