Thread: [UPDATED-Xena RAT 2.0.1 || \[Insane stability & speeds\]\[Delphi\]\[50% off Crypter!\]](#)

AceVoid - January 12, 2015, 12:05 am

(Apr 13, 2015 11:52 AM)TheCookieMonster Wrote: [\[CITE\]](#) UPDATE:
So it looks like my main hosting service <http://www.xrontic.com>
is either down, or doesn't exist anymore...

Good news, it's an easy fix. Get a new host and update the RAT.

Bad news, I have a job and collage at the same fucking time. This means that all of my customers are going to need to be PATIENT

I'm only one man and there's only so much I can do at a time! So all of you, please just bare with me in the meantime...

The crypter is still functioning normally, at the moment it's just Xena that needs to be updated. this will be done ASAP.

Thank you all for your patients, I appreciate it more than you can imagine in this uncertain time of my life.

lort1234 - February 22, 2015, 9:00 am

Idon't like that, you have made an rat program before, and just stop it, so all the people that have bought it lose it. And then you made an new one whit a new name, but still the same program... If it was me i would never buy an program from you, because you always stop it and give it a new name and sell the same program again.

Star isn't supposed to be there :)

Also, Wardow still updates the online hosted stub for BosonLight, all NetSeal licenses for the crypter are automatically generated when you buy the Gold Package.

EDIT: Also forgot to mention, BosonLight crypter is included with the Gold package. So if you buy gold, you will get the RAT and Crypter in one package while the license for the Crypter will be sent to your email address.

If it was me i would never buy an program from you, because you always stop it and give it a new name and sell the same program again.

Now don't get you panties in a knot, Department Of Protection BOUGHT the source from me and HE sold it. I have nothing to do with the other RAT once it left my ownership.

Also don't come talk shit if you don't know what you're talking about, Xena RAT and the RAT DOP sold are to completely different things. Get your facts straight.

Modify from SS-RAT. I think change this solutions. Because this codes very slow working. Threads
is unstable. You notice after 100 connections.

hi just purchased your rat but on running it attempts to update and gives a file not found error and
downloads a update file /exe with 0bytes repeatedly it don't give any indication of missing file i
presume its ether a dependance or a update error could you help please thanks in advance

running it on windows 7 64bit

Ah most slaves I personally had and tested on was about 50, but I am absolutely sure it can hold way way way more without issues.

No password recovery sorry, might add in next few updates.

Crypter does have a built-in binder yes.

Real life work is a bitch. Sorry I've been away for so long but I just have no time anymore.

What I can do is give you a download link to the updated version.

UPDATE:

So it looks like my main hosting service <http://www.xrontic.com> is either down, or doesn't exist anymore...

Good news, it's an easy fix. Get a new host and update the RAT.

Bad news, I have a job and collage at the same fucking time. This means that all of my customers are going to need to be PATIENT

I'm only one man and there's only so much I can do at a time! So all of you, please just bare with me in the meantime...

The crypter is still functioning normally, at the moment it's just Xena that needs to be updated. this will be done ASAP.

Thank you all for your patients, I appreciate it more than you can imagine in this uncertain time of my life.
