Thread: [I need a logo/icon of a "Raven"](#)

Alien - January 12, 2015, 12:21 am

Could somebody make me one? I need it for my program/application.

Thanks to anyone that can do this for me :)

What dimensions would you want it to be?

Raguel - January 12, 2015, 7:30 am

I'll get this done for you later today. Feel free to PM me if you want any other specifications :)

Somewhere around 350 x 450 and it needs to be saved as .png and preferably 200 kb or smaller.
The icon is for my program coded in visual studio. It isnt an Apple or android app.

It looks good.. but I think I'm more looking for something like a raven that is flying or kind of having a fierce demonic look to it. I made this thread last night and I wasn't thinking straight at the time (Im sick) so I should of put more specifications on what I am looking for.

Here is an example of what I am looking for:

I would use that.. but I don't want to rip it. (found it off google lol)

Maybe something like this? I got found this raven design in one of my old folders and just redid it:

What do you want me to change?

I like the 3rd one a lot. Could you make it look kind of faded like the 2nd one.

Also.. my program/software is a Mass Checker. Out of curiosity.. if it wouldn't be to much trouble.. maybe you could try and fit a magnifying glass somewhere.. idk how it would look but I wouldn't mind seeing what the possibility would look like.

Thanks for taking the time to assist me. :)

Like this...?

Rushed the magnifying glass, if you want the gradient overlay on that too then just tell me.

Also, I just thought of something that I think would look really sick.

Could you some how change the eye to this?

Its the mangekyou shargingan eye from the anime/manga Naruto.

Thanks again for your time. I appreciate it. :)

Yes! That looks perfect! That will work!

Thanks so much for all your help! :)
