Claims to sell and set-up Betabot: <https://hackforums.net/showthread.php?tid=3718426>

Claims to sell 'full package' of Betabot 1.7.1: <http://prntscr.com/5ref6h>

He says that he is selling a 'legit copy' of Betabot: <http://prntscr.com/5rdwat>

Claims he is the official reseller of Betabot: <http://prntscr.com/5regos>

So, I foolishly I trusted him and I paid him through paypal (negotiated a final price of \$330) as shown here: <http://prntscr.com/5rdx90>

After the payment he sent me the files after a long wait...: <http://prntscr.com/5rejgv>

After he finally got the botnet set-up and sent me the login I realise lots of the features are broken such as the form grabber which doesn't even grab anything from about 2 days with 20 bots (and yes I correctly set up the sites to grab the forms from): <http://prntscr.com/5rekga> (These are bots I've hand picked from my RAT of about 1000 clients right now who login to sites such as Youtube, Runescape, Google etc alot)

Also bots that are dead/uninstalled/deleted remain in the table and are unable to be removed etc (lots of bugs)

After some research I found out that I was sold a cracked version (<http://prntscr.com/5ribmn>) , and the cracked version of Betabot has a formgrabber that doesn't even work and that the coder of Betabot isn't even selling beta any more among other things and realised that I was lied to and scammed by Blue Shark, who was using a free cracked public builder and sold the cracked Betabots files for a price, he insisted on, of \$330...

I'm hoping that I can get my money back for this because I was clearly scammed and exploited for \$330...

EDIT: He is now threatening me: <http://prntscr.com/5rw6e0>

Heulen - January 12, 2015, 6:16 am

Have you tried charging back the payment?
seems like a legit scam report.

G^aNNicus - January 12, 2015, 6:21 am

Betabot owner isn't selling anymore atm. If he is he wouldn't let this Indian resell for him, for fuck sake.

formgrabber doesn't work, so its definetly the cracked version.

Legit scam report!!!

You paid for legit software and you've received cracked software.
Just contact Paypal!, you'll get your money back, "unauthorized sent transaction."
Don't trust this shady indian!

PoisonKnife - January 12, 2015, 6:25 am

The cracked version can be found for free.
If you want the official version, then PM me for my jabber.

OneWorldOrder - January 12, 2015, 6:35 am

Form grabber doesn't work anymore for obvious reasons. It was patched in newer browser updates.

Nothing has changed in IE that would break the FG. Also, blue shark shouldn't be selling a bot with broken features unless he specifies that's the case.

Good luck OP

Wath a fucker. Sorry for your Lose op!

immortalwon - January 24, 2015, 8:37 am

Formgrabber was always buggy on betabot bro, he didn't scam you. The coder is missing in action anyways. Although blueshark does have bad support, that I can agree on.

No it is definitely the cracked version... was also confirmed to me by many trusted people on HF...

Are you for real ? Did you even see the screenshot which OP posted ? Or you're just so ignorant ?

Blueshark particularly said that there's no cracked version of betabot when there is.

Are you trying to cover him up ?

xXDavidXx - April 4, 2015, 2:30 am

damn this really does suck im sorry mate thanks for letting the community know about this scammer sorry for your loss i hope you get your money back.

skynet - April 4, 2015, 2:30 am

I see a lot of these types of scams going on. It is usually the people who offer botnet setups etc they will purposely lie to you so you buy from them.

Blueshark claims there is no crack...There is a crack and the version he is giving out is the public one and he is using dyans builder for betabot.

I am sorry this happened to you. Also he claims to be the official reseller I bet if you ask betamonkey himself he will tell you he has no resellers and that blueshark scammed you.

In his skype he says he is selling 1.7.1...that is the last version Betamonkey made and that is the version that got reverse engineered by dyan (released the builder)

magicslurp - April 4, 2015, 9:11 am

I can vouch the report is legit. His hosting also is not bulletproof to any degree of meaning. He will

overcharge by massive amounts and then leave you high and dry with his cracked programs and hosting that will collapse in 2 weeks. Unfortunately I've also lost out. Actually quite more than the OP.

Marquees Turing - April 4, 2015, 10:32 am

This guy (Blue Shark) just neg repped me for exposing him out. LOLOL

Shanks - April 4, 2015, 10:35 am

I bought two month hosting from him, one of them was good the other was offline.. mixed feelings on him.

He won't and neither will I. Meanwhile the admins and mods allow this to continue by deleting and silencing people who talk about the service factually on his threads.

Jisatsu - April 20, 2015, 6:54 pm

lol this guy is a pos. I want to keep this up! :)

How much I care about blue shark and his lies. he also neg rep me saying I blame him for no reason.

RoguePhantom - April 20, 2015, 7:48 pm

Blueshark is an Indian, or 12, or both. I'm sure I'm about to get negged but whatever. The kid's a scammer and thinks his petty scare tactics will work.

Yep just confirmed from my sources. He's an INDIAN AND HE CLAIMS THAT HE IS NOT.....

Btw he negged me and look at what he said : " Revenge REP, Low Quality USER." Lmao

I can't even rep him in the first place. OBVIOUS SCAMMER ! Should be banned from this site.

magicslurp - April 22, 2015, 12:22 pm

It's fucked up because he actually does deliver something, only it's not what he says. His hosting sucks complete fucking ass, he'll steal your domain etc. Scammed \$400+ by this piece of shit. Meanwhile people are happy he's selling them shit hosting and cracked nets that are garbage. What a joke.

Apparently you don't know him well enough.

Convictus - May 17, 2015, 8:18 pm

I as well have purchased a net from him (seemed like a good deal). I should of just done it myself, as the panel is always down, he always 'recovers' the net and gives me a new link. Asked for a refund and he said no.

I hope you get your money back OP, as I certainly won't.

Guarded Merchant™ - May 17, 2015, 8:36 pm

Love how people threaten by saying I will ddos you lol, Funny cause our life is gunna end when you ddos someone. Ring the internet provider and ask them to change you IP too easy ;)

SprayPaint - May 18, 2015, 3:53 am

Yeah, I hate to say it but this looks like a legit scam report. You were scammed for a cracked version.

I would like to say that you'll get your money back, but I doubt it.

Holy shit:

Right? Try to say one word about his disservice even in a polite manner on the selling thread and it gets deleted. Such bullshit.

Thanks SprayPaint I'm glad some decent people are around on here.

Fr?sh - May 18, 2015, 8:08 pm

"I have already dox you"

"I know how to handle"

"You are finish now"

I think he should use that \$300 to pay for some grammar lessons

Blueshark is a con artist. He scammed me over 100 bucks though I never made a report. He kept charging me for hosting after I cancelled it due to the lies he told me and how he suspended me and shit. Legit report
