Hey guys! I got this off Hack Forums a long time ago and I can't remember where I got it from but here you go. It was free so they probably won't mind me giving it away.

I did ctrl.f and typed my password, 0 results :(

NoMercy - January 15, 2015, 12:02 am

You sir, clearly have a decent password. How do you even open that file anyway, it's too big for my computer to handle I think since I always get unresponsive.

Unturned - January 15, 2015, 12:03 am

I open in 5 seconds with Intel i5 and 12 GB RAM.

I have a really nice build if you want somewhere to start, its a bit on the pricey side, but its super specific to my needs. But I finished building it a couple of days ago and I'm completely in love. If you're interested I can send you the link
