Thread: [FireFox Tutorial - Closed](#)

FRANKIE - January 12, 2015, 2:27 pm

[\[img\]http://quickimage.space/up/gFsxkWoeivujr1x.png\[/img\]](#)

This thread has been closed. Thank you for your understanding. If you have any questions as to why, please PM me.

SethRenard1 - January 12, 2015, 2:44 pm

Very nice video, hopefully people can learn from it.

FRANKIE - January 12, 2015, 6:10 pm

Thanks. Hopefully I will be able to post more nice finds like this.

I really like this video and the simplicity of it all.

Fudster - January 12, 2015, 6:11 pm

(Jan 12, 2015 07:10 PM)NoScript Wrote: [\[CITE\]](#) Thanks. Hopefully I will be able to post more nice finds like this.

I really like this video and the simplicity of it all. Want to know how you can get my respect? You should make it into a list....on a thread...

Anton Ego - January 12, 2015, 6:11 pm

[youtube.com/watch?v=k25e2W-0YSA](https://www.youtube.com/watch?v=k25e2W-0YSA)

here's the link so others can use it easily.

FRANKIE - January 12, 2015, 7:00 pm

Thanks for making the link bearable. Hopefully this will help some of you out.

(Thread Updated)

moopy - January 12, 2015, 10:01 pm

Hell yeah. I'm not even close to understanding what I'm really doing with those configurations but nice find.

FRANKIE - January 12, 2015, 10:07 pm

(Jan 12, 2015 11:01 PM)moopy Wrote: [\[CITE\]](#) Hell yeah. I'm not even close to understanding what I'm really doing with those configurations but nice find.

Ain't no thang but a chicken wang.

Glad you enjoyed the video

if_statement - January 13, 2015, 4:56 pm

This is a great video thank you op
35 char limit

FRANKIE - January 13, 2015, 4:58 pm

No problem I am glad you could benefit from it

moopy - January 14, 2015, 11:24 am

whoa wait! Some of these configurations reset every time I close FF. What's the deal? Is there a "save configurations" button I'm missing before closing about:config or is this something I'd have to do every time I use FF?

FRANKIE - January 14, 2015, 11:41 am

this should definitely not be happening, and I am pretty sure there is something different wrong because for me and for other people the settings are saved

moopy - January 14, 2015, 5:28 pm

I left a comment on the guy's page, I hope this can be resolved. Fucking weird.

Br4v0 - January 22, 2015, 10:34 pm

thanks for this useful videos , useful for me , applied few things

FRANKIE - January 29, 2015, 5:28 pm

(Jan 22, 2015 11:34 PM)Br4v0 Wrote: [\[CITE\]](#) thanks for this useful videos , useful for me , applied few things

Glad to see that you were able to use it to your benefit.

swagnemitelol - January 31, 2015, 7:29 pm

Thanks for this, pretty damn useful.

FRANKIE - February 4, 2015, 6:15 pm

Glad to see others using this guide to help them.

NoScript - February 4, 2015, 7:16 pm

Not back but I would remove Ad block plus and replace it with Privacy Badger :)

FRANKIE - February 4, 2015, 7:32 pm

It is just my personal preference, everyone has their own.

ja_yen - February 5, 2015, 12:33 am

This is great thanks dude..?

Beowulf6 - February 5, 2015, 1:55 am

I can appreciate the video for it's simplicity and effectiveness, but do you mind explaining what the script changes are for a humble noob like myself?

Cyrus - February 5, 2015, 7:38 am

You should explain next to them what each one does.

Nice video: https://www.youtube.com/watch?v=ZQu_D7w5I1A

Code ABOUT:CONFIG SEARCH AND VALUES

These settings prevent Firefox from storing cache on your system:

browser.cache.memory.enable - value: false

browser.cache.offline.capacity - value: 0

browser.cache.offline.enable - value: false

browser.cache.disk.capacity - value: 0

browser.cache.disk.enable - value: false

browser.cache.disk.smart_size.enable - value: false

browser.cache.disk.smart_size.first_run - value: false

browser.cache.disk_cache_ssl - value: false

This prevents Firefox from sending fonts to the websites you visit - fonts on your computer can be unique, and may very well identify you:

browser.display.use_document_fonts - value: 0

This increases your privacy:

browser.sessionhistory.max_entries - value: 2

This prevents any data from being stored on your computer:

dom.storage.enabled - value: false

This prevents websites from determining your location based on your IP:

geo.enabled - value: false

That's something I would do if I have the time. Currently I am working on a few mega tutorials to be posted soon.

Divisionan - February 5, 2015, 9:07 am

This is a great video thank you for sharing it with us.

FRANKIE - February 5, 2015, 10:44 am

No problem I am glad you enjoyed it.

Cyrus - February 5, 2015, 5:57 pm

network.cookie.cookieBehavior (changing this to 1) fucks up youtube commenting.

You can't comment on Youtube videos when you chance this to 1.

FRANKIE - February 5, 2015, 8:40 pm

Like I said, hopefully I will have enough time to finish my mega tutorial and post it. Everything is explained in that one.

Thanks for pointing it out though.

-=King=- - February 6, 2015, 5:28 am

Nice Information and Great work. Go Ahead with more:-)

FRANKIE - February 6, 2015, 8:39 am

Will do, thank you for the kind words. I will get everything updated soon.

Cyrus - February 6, 2015, 9:56 am

Thanks for pointing it out though.

Ik, just letting others reading this thread know atm.

Since you ain't edited it in, by the time you reply to my reply you could have edited it in. :P

GL with your mega tutorial.

T0ucaNSaM - February 6, 2015, 10:01 am

Checking it out now, thanks for the time you spent into doing this

FRANKIE - February 11, 2015, 4:22 pm

Thanks, it took me a while to put together. I always appreciate feedback. ?

logging*machine - February 12, 2015, 2:03 pm

Da fuck is this bullshit?

????

FRANKIE - February 18, 2015, 12:33 pm

Did you not find this thread helpful? Please elaborate so that I may better adjust.

ZuGgY - February 18, 2015, 12:35 pm

My question is, do you use Firefox over Chrome for your everyday browsing? Which do you recommend honestly, out of the 2?

FRANKIE - February 18, 2015, 12:37 pm

(Feb 18, 2015 01:35 PM)ZuGgY Wrote: [\[CITE\]](#) My question is, do you use Firefox over Chrome for your everyday browsing? Which do you recommend honestly, out of the 2?

I do use firefox with security settings over chrome everyday. My regular browsing is done on a separate computer w/chrome and a few extensions.

I honestly recommend Firefox for privacy & overall browsing.

Lemin - February 18, 2015, 2:16 pm

Great video, This is probably a stupid question but is all of this as safe as browsing with a VPN up?

FRANKIE - February 18, 2015, 2:18 pm

(Feb 18, 2015 03:16 PM)Lemin Wrote: [\[CITE\]](#) Great video, This is probably a stupid question but is all of this as safe as browsing with a VPN up?

No, this takes away a bit of tracking that takes place on a normally configured browser. Always use a VPN no matter what. In addition to this, it is just all the more secure.

Mr_BuRsT - February 18, 2015, 3:27 pm

Hey man, loved the video. I'm a noob at this shit, a website that runs Java and shit, it isn't working but I allowed it to be used, and it still isn't working. It's mafiareturns.com think you can help me out? Also, what's a good free VPN to use?

FRANKIE - February 18, 2015, 3:29 pm

(Feb 18, 2015 04:27 PM)Mr_BuRsT Wrote: [\[CITE\]](#) Hey man, loved the video. I'm a noob at this shit, a website that runs Java and shit, it isn't working but I allowed it to be used, and it still isn't working. It's mafiareturns.com think you can help me out? Also, what's a good free VPN to use?

Here is a good list of free VPN's

<https://hackforums.net/showthread.php?tid=4645339>

Also, could you explain your problem a bit more?

Mr_BuRsT - February 18, 2015, 3:30 pm

Like.. it's hard to explain. Mainly, this site uses Java and to click the different links, it won't load. It just stays at that page and it reloads for like ten minutes. Need SS's?

FRANKIE - February 18, 2015, 8:09 pm

(Feb 18, 2015 04:30 PM)Mr_BuRsT Wrote: [\[CITE\]](#) Like.. it's hard to explain. Mainly, this site uses Java and to click the different links, it won't load. It just stays at that page and it reloads for like ten minutes. Need SS's?

I would just access that site individually on Chrome. You should not have any problems with it then.
